

**Communication Device**  
**for control & independence**

## Tobii C8 Communication Device

**The perfect choice for anyone in need of a small, lightweight yet powerful communication device - providing control and independence in one.**

### Communication is key

A variety of communication methods allow Tobii C8 users the ability to achieve their full potential. A user can communicate via text or symbols to generate synthesized or digitized speech for face-to-face interaction or connect\* through email, text messages or chat.

With the Tobii C8, users also have the freedom and flexibility to write and edit documents, surf the Internet, play music and games, control a TV, DVD and other household appliances (additional equipment required) and even plan and manage their time – making independence easy.

### Your choice of software

The Tobii C8 allows users to select and implement the most appropriate software language options and settings for fast and effective communication. At any time a user can decide to alter these choices or upgrade the system or software to accommodate their changing needs and interests.

The Tobii C8 includes Tobii Communicator Standard edition package, which allows for communication via text, or with over 15,000 SymbolStix® symbols. Tobii Communicator Premium, an upgrade, includes email, text messaging, and environmental control.

### Easy to set up, easy to use

Personalized setup is simple and only takes a few minutes. Multiple user profiles can even be stored on a single device making it ideal for use in the classroom and for those wanting separate user settings depending on the time of day.

### Extremely portable

The Tobii C8 is lightweight and extremely portable. It can easily be carried between home, school or work, or can be mounted and used on a wheelchair. Thanks to its design, impressive battery life, powerful components and stable operating system, the Tobii C8 enables users to easily communicate and engage with others.

The Tobii C8 allows users to be active on the playground or in their community by offering hot swappable batteries, a moisture resistant construction, silent operation, powerful stereo speakers and a flat and easy to clean screen.

With no protruding USB sticks, cables or adapters the design is not only sleek and attractive, but also less distracting and more resilient.

### Personalisation

The Tobii C8 is easy to personalise. The interchangeable coloured side panels can

change the appearance of the device from discrete to colourful in seconds.

### Product specifications Tobii C8
