# Communicator 5

Importing Communicator 4 Page Set to Communicator 5:

Communicator 5 is backwards compatible with Communicator 4, so content that has been made and used with that version can easily be imported.

Note: You must first backup your Communicator 4 page set before you can start this process. For step-by-step instructions, go to **www.tobii.com/en/assistive-technology/global/support-and-downloads/faqs/50130000000Sqzv/**

1. *Open* the **Caregiver Menu**
    (touch and hold anywhere on the screen or press this button on the left side of the device. You can also right click if you are using a mouse. Or select Ctrl +M on the keyboard)

    Quick menu selection options

2. *Select* **Caregiver Settings**

3. *Select* the **User Settings** tab.

4. *Select* **(Import/Export) button**, which opens a wizard to assist you.

5. *Select* **Import** selected settings and data

6. *Browse* to the location of the files to import.
    - *Select* **+** next to This PC/Computer
    - Select the the location where you exported the file
    - *Select* the **.vse** file in the right viewport
    - *Select* **Next**
    - *Select* **Full Import.**

7. You can now decide which user to apply these Page Sets and settings to
    - An existing user will overwrite your current user and not add to the pagesets
    - A new user will create new user and not bring over any current Communicator 5 info

8. If necessary, you can later change users.
