

Read Me First – Maine Medicaid Requirements for Prior Auth

1. The augmentative communication and speech evaluation will be reviewed by Medicaid to ensure that it meets their requirements for approval. Please include the following information in the evaluation. (It is recommended that the evaluation be written in Medicare format)
 - a. A description of the client's diagnosis, prognosis, past treatment history, ability to use a speech generating device and physical ability to access the device.
 - b. A list of 3-5 SGD's that have been considered and the reasons that they have been ruled out. Be sure to include the manufacturer's pricing of these devices in your comparison.
 - i. This comparison can include low and high-tech devices
 - ii. Must rule out alternative methods of communication, i.e. writing and sign language
2. A 4-week trial period with the recommended device is required and should be documented within the report. (This trial period should be documented within its own section)
3. A comprehensive plan of care and training plan including:
 - a. The name & qualifications of the person responsible for programming the device.
 - b. Estimated length of time for the programming to be completed (when will the device be fully operational for the client).
 - c. The type of training that will be provided.
 - d. The anticipated length of training.
4. A physician's prescription and letter of medical necessity (LMN) is required. The prescription and LMN should not be combined. Medicaid prefers a RX listing the recommended equipment and a separate LMN indicating the physician's agreement of the recommendations. Physician's prescription needs to indicate a date last seen by the physician that is dated within 6 months of our submission to MainCare.
5. InterQual Criteria Sheet (Speech generating device, synthesized speech): The InterQual Criteria sheet for AAC device must be completed and signed by the referring physician. The SLP can complete the necessary sections for each client and forward to the physician for signature.

No Longer Required: OT/PT Assessment, Sensory Assessment (Audiologist), Intellectual Assessment (Psychologist), Vision Assessment (Ophthalmologist), Letter of Assurance from School
