DSHS 15-310 (REV. 05/2010)
Client ID

Power wheelchair user. Drives with:
- standard joystick
- head control
- chin control
- sip and puff
- other (specify):

Client has reliable and consistent motor responses sufficient to operate a SGD.

Describe any gross or fine motor skill limitations that would affect ability to use a SGD, and what device modifications and/or accessories would be needed to overcome those limitations.

SECTION IV: RATIONALE FOR PRESCRIBED DEVICE

Identify all SGDs considered for the client. Choice of SGDs to consider should reflect a range from low to high tech, as appropriate. Recommended device should be the least costly alternative that meets the client’s need for functional communication. Add additional pages if documenting more than 5 device trials. Circle the name of each device trialed, and state the name of any others trialed that are not listed.

### 1) Device description:
Digitized speech using prerecorded messages, less than or equal to 8 minutes recording time.

**Check all listed devices trialed:**
- Tech-Speak
- Message Mate 40/300
- Message Mate 20/60
- Message Mate 20/120
- Step by Step

Other non-listed devices trialed:

Describe setup and any modifications or accommodations:

Additional comments:

**OUTCOMES:**
- Ruled out without trying due to:
- Ruled out following trial due to:
- Tried and considered appropriate

Type of communication demonstrated:
- Spontaneous
- Response

### 2) Device description:
Digitized speech using prerecorded messages with greater than 8 minutes but less than or equal to 20 minutes recording time.

**Check all listed devices trialed:**
- Macaw 3
- Message Mate 40/600
- DynaMo
- Easy Talk

Other non-listed devices trialed:

- [ ] Ruled out following trial due to:
- [ ] Tried and considered appropriate

**Type of communication demonstrated:**
- [ ] Spontaneous
- [ ] Response

### 4) Device description:
Synthesized speech, message formulation by spelling and access by physical contact with device.

**Check all listed devices trialed:**
- [ ] DynaWrite
- [ ] Link
- [ ] Lightwriter
- [ ] Chat PC II

Other non-listed devices trialed:

Describe setup and any modifications or accommodations:

Additional comments:

**OUTCOMES:**
- [ ] Ruled out without trying due to:
- [ ] Ruled out following trial due to:
- [ ] Tried and considered appropriate

**Type of communication demonstrated:**
- [ ] Spontaneous
- [ ] Response

### 5) Device description:
Multiple methods of message formulation and device access, synthesized and digitized speech.

**Check all listed devices trialed:**
- [ ] DynaVox MT4
- [ ] Dynavox DV4
- [ ] Mercury
- [ ] Gemini
- [ ] Enkidu E-Talk
- [ ] Mini Merc

- [ ] Ruled out following trial due to:
- [ ] Tried and considered appropriate

**Type of communication demonstrated:**
- [ ] Spontaneous
- [ ] Response

### Type of current communication behaviors
SECTION V: TREATMENT PLAN AND FOLLOW UP TRAINING IN USE OF THE DEVICE.

COMMUNICATION GOALS:

1) Describe how client will be able to independently and effectively communicate medical needs to healthcare providers utilizing the requested SGD.

2) Describe environments in which the requested SGD will be used.

3) Describe how client will attain specific speech therapy goals and objectives according to the speech treatment or training plan.

4) State the plan of care indicating who will initially train the client with the device, assess efficacy of the SGD to meet the client’s stated needs, program the device, and monitor and re-evaluate the client on a periodic basis.

Note: It is expected that the treating SLP will be involved with the development of this treatment plan. It is the evaluating SLP’s responsibility to develop, in coordination with the client, caregivers, and treating SLP (e.g., school, day program, LTC) a basis vocabulary to be provided to the vendor for initial setup of the device.
