1 Introduction

Thank you for purchasing a Tobii I-Series device from Tobii Technology!

To ensure the optimal performance of this product, please take the time to read this manual carefully.

The Tobii I-Series device is available in two different sizes: the Tobii I–12 with a 12.1" screen and the Tobii I–15 with a 15.0" screen. The Tobii I-Series is a Gaze Interaction device but can be ordered without the Gaze Interaction function.

This User’s Manual covers:

- The Tobii I-Series Control Center (for controlling the device and the Tobii Product Key).
- The Tobii Gaze Interaction functions

1.1 Explanation of Admonitions

In this manual we use five (5) levels of admonitions as follows:

- **i** Is used for notifying the user of something important or of something that needs special attention.

- **!** Is used to inform of something that could cause harm to, or malfunction of, the equipment.

- **!** Is used to inform of something in which there is a conceivable risk of harm to the user if the Warning is ignored.

- **!** Is used to inform of something that can cause damage to hearing.

- **!** Is used to inform of something that cause permanent bodily harm with prolonged skin contact if the Warning is ignored.

1.2 Symbols and Markings

This section provides information about the symbols that are used on the Tobii I-Series, its accessories or packaging.

1.3 Intended Use

The Tobii I-Series is an Augmentative and Alternative Communication (AAC) product, a purpose built Speech Generating Device (SGD) designed to provide to its users increased communication ability and greater independence.

The Tobii I-Series is intended primarily to provide, and act as, a compliment to everyday communication for people that have challenges in their ability to speak due to injury, disability or illness. This intended use is reflected in design features such as long lasting batteries, superior sound quality, high durability, built in environmental control and connectivity features.

The Tobii I-Series is a Gaze Interaction device with a built-in Tobii Eye Tracker (optional) and a capacitive touch screen for touch access. The device is intended to be used in two orientations: one, upright and mounted (or standing upright, vertically, on an appropriate surface) for Gaze Interaction use, and two, lying flat (resting in a horizontal orientation) for touch access optimization. Tobii Gaze Interaction and touch can be used in combination with switches, keyboard and/or scanning as additional input methods.

The Tobii I-Series is designed primarily for face-to-face communication and secondarily for long distance communication, computer access and on-line social interaction. The Tobii I-Series allows the user to communicate via text or symbols to generate synthesized (computer voice) or digitized (recorded voice) speech for face-to-face communication. The variety of communication methods allows Tobii I-Series users the ability to realize their full potential.

The Tobii I-Series allows its user many options of communication through text message, chat and voice calls via Bluetooth® to cell phone, WiFi to Skype®, Internet to E-mail and other third party applications such as Facebook®.

With the Tobii I-Series, users have the freedom and flexibility provided via the Microsoft® Windows environment, as well as the option to control TV’s and other household appliances via the GEWA Programmable IR Remote Control.

The Tobii I-Series meets the definition for durable medical equipment; and is registered as a Class 1 medical device. The Tobii I-Series is available in two (2) sizes; and is available as a dedicated (locked) Speech Generating Device.

⚠️ The Tobii I-Series device does not sustain or support life.

In case of failure of the Tobii I-Series device, the user cannot communicate using it.

1.3.1 Portable Use

A portable Tobii I-Series can be used in two (2) different positions.
• Upright orientation
• Resting orientation

The Upright orientation is optimized for Gaze Interaction users and the Resting orientation is optimized for Touch or Scan users.

1.3.2 Mounted Use

The Tobii I-Series can be mounted on to several mounting systems. Mount the Tobii Quick Release (QR) adapter plate on to the device. The Tobii QR adapter plate can be attached to the following support systems:

• Daessy
• REHAdapt

For more information, see 3.6 Tobii Quick Release Adapter Plate, page 14 and Appendix F Approved Accessories, page 82.

1.4 Package Contents

Keep the original packaging materials for the Tobii I-Series.

In case the device needs to be returned to Tobii for Warranty related issues or repair, it is required that the original packaging (or equal equivalent) is used for shipping.

1.4.1 Tobii I-Series with Tobii Communicator

The items below are included with your Tobii I-Series package:

• 1 Device (12" or 15"")
• 1 Eye tracker (built in)
• 1 Tobii QR adapter plate
• 2 Batteries
• 1 Power Supply
• 1 Windows 7 Home Premium license
• 1 Tobii Communicator (pre-installed)
• 1 Tobii Sono Suite (pre-installed)
• 1 USB stick with Tobii Communicator and Tobii Sono Suite
• 1 I-Series User’s Manual (on the device as a PDF document)
• 1 Quick Start Manual (printed)
• 1 Getting Started with Essentials TC 4.8 (printed)
• Safety and Compliance documents
• Warranty Document
1.4.2 Tobii I-Series with DynaVox Compass

The items below are included with your Tobii I-Series package:

- 1 Device (12” or 15”)
- 1 Eye tracker (built in)
- 1 Tobii QR adapter plate
- 2 Batteries
- 1 Power Supply
- 1 Windows 7 Home Premium license
- 1 DynaVox Compass (pre-installed)
- 1 I-Series User’s Manual (on the device as a PDF document)
- 1 Quick Start Manual (printed)
- Safety and Compliance documents
- Warranty Document
2 Safety

The Tobii I-Series device has been tested and approved as compliant to all the Specifications and Standards listed in Appendix B Compliance Information, page 67 of this manual and in the Appendix E Technical Specifications, page 77 – including, but not limited to, the Medical Device Standard (Class 1/Type B). Nevertheless, in order to ensure safe operation of your Tobii I-Series device, there are a few safety warnings to bear in mind:

- **No modification of this equipment is allowed**

- The Tobii I-Series is not to be used as a life supporting Device, and it shall not be relied on in case of loss of function due to power loss or other causes.

- There could be a choking hazard risk if small parts detach from the Tobii I-Series device.

- The Tobii I-Series device shall not be exposed to or used in heavy rain or weather conditions outside the Technical Specification of the Tobii I-Series device.

- The Tobii I-Series device shall only be used with Tobii I-Series specific Accessories that have a mounting instruction included with the accessory.

- Young children or people with cognitive disabilities should not have access to, or the use of, the Tobii I-Series device without parental or guardian supervision.

- Do no attach any decorations, post it notes or similar on the screen side of the Tobii I-Series device, that may interfere with the Gaze Interaction or touch screen performance.

### 2.1 Avoiding Hearing Damage

Permanent hearing loss may occur if earphones, headphones or speakers are used at high volume. To prevent this, the volume should be set to a safe level. You can become desensitized over time to high sound levels which may then sound acceptable yet still could be damaging your hearing. If you experience symptoms such as ringing in your ears, please lower the volume or stop using the earphones/headphones. The louder the volume, the less time is required before your hearing could be affected.

Hearing experts suggest the following measures to protect your hearing:

- **Limit the amount of time you use earphones or headphones at high volume.**
- **Avoid turning up the volume to block out noisy surroundings.**
- **Turn the volume down if you cannot hear people speaking near you.**

To establish a safe volume level:

- **Set your volume control at a low setting,**
- **Slowly increase the sound until you can hear it comfortably and clearly, without distortion.**

### 2.2 Temperature

This device can be made to operate in two different modes, Portable and Mounted. When the device is in Mounted mode it is allowed to run at a higher temperature; it sets the maximum allowable environmental temperature to its highest level. The risk with running the device in this mode is that it can reach temperatures in which prolonged use with direct skin contact may cause permanent bodily harm. Portable mode sets the maximum device temperature shut down limit to a lower temperature, reducing the risk for permanent bodily harm caused by prolonged exposure to the skin. Only choose Mounted mode when the device is mounted on a wheelchair, table, etc, with a proper mounting system.
Due to use in direct sunshine or in any other hot environment the Tobii I-Series device may have hot surfaces. There is a built-in temperature sensor that monitors the temperature. If the sensor detects temperatures above the temperature specified in Table D.1 Maximum Allowed Temperature, page 76 for portable mode and mounted mode the device will automatically trigger a Windows Shut Down or Hibernate (depending on Windows Power Button configuration) to not cause the User any risk of harm. It may take a while before Tobii I-Series device can be restarted as the unit may first need time to cool down.

2.3 Power Supply and Batteries

The Tobii I-Series device uses Lithium Ion batteries. These batteries have a storage temperature range of between -20 °C/-4 °F and 40 °C/104 °F within 6 months.

If you are in a hot environment, be aware that it can affect the ability to charge the batteries. The internal temperature has to be between 0 °C/32 °F and 45 °C/113 °F for the batteries to charge. If the internal battery temperature raises above 45 °C/113 °F the batteries will not charge at all.

Move the Tobii I-Series device and the batteries to a cooler environment to let the batteries charge properly.

Avoid exposing the batteries to fire or to temperatures above 50 °C/122 °F. These conditions may cause a battery to malfunction, generate heat, ignite or explode. Be aware that it is possible, in a worst case scenario, for temperatures to reach greater than those stated above in, for example, the trunk of a car on a hot day. So, storing the device, with batteries installed, in a hot car trunk could conceivably lead to a malfunction.

Do not disassemble or harm the battery. Pay attention to the environmental laws and regulations which apply in your area when disposing of batteries.

For safe operation of the Tobii I-Series device, use only charger, batteries and accessories approved by Tobii Technology.

Do not open, or modify, the metal casing of the Tobii I-Series device or of the power supply, since you may be exposed to potentially hazardous electrical voltage. The device contains no serviceable parts. If the Tobii I-Series device or it's accessories are mechanically damaged, do not use them.

If the batteries are not charged or the Tobii I-Series is not powered up by the power supply, the Tobii I-Series device will shut down.

If the Power Supply Cord is damaged, replaceable by Service Personnel only

Do not connect any devices with a non-medical grade power supply to any connector on the Tobii I-Series device.

The appliance coupler of the power supply or separable plug is used as the Mains Disconnection Device, please do not to position the Tobii I-Series device so that it is difficult to operate the disconnection device.

Special regulations apply to shipping Lithium-ion batteries. If dropped, crushed, or short-circuited, these batteries can release dangerous amounts of heat and may ignite, and are dangerous in fires.

Please reference IATA regulations when shipping lithium metal or lithium ion batteries or cells: http://www.iata.org/whatwedo/cargo/dangerous_goods/Pages/lithium_batteries.aspx

2.4 Mounting

The Tobii I-Series should be mounted according to MANUFACTURER instructions of approved mounts. Tobii Technology or its agents are not liable for damage or injuries to a person or its property due to a Tobii I-Series falling from a mounted configuration. The mounting of a Tobii I-Series is done entirely at the user’s own risk.
2.5 Emergency

Do not rely on the device for emergency calls or banking transactions. We recommend having multiple ways to communicate in emergency situations. Banking transactions should only be carried out with a system recommended by, and approved according to the standards of, your bank.

2.6 Infrared — Eye Tracker

When activated, the Tobii I-Series emits pulsed infrared (IR) light. Certain medical devices are susceptible to disturbance by IR light and/or radiation. Do not use the Tobii I-Series when in the vicinity of such susceptible medical devices as their accuracy or proper functionality could be inhibited.

2.7 Epilepsy

Some people with Photosensitive Epilepsy are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns in everyday life. This may happen even if the person has no medical history of epilepsy or has never had any epileptic seizures.

A person with Photosensitive Epilepsy would also be likely to have problems with TV screens, some arcade games, and flickering fluorescent bulbs. Such people may have a seizure while watching certain images or patterns on a monitor, or even when exposed to the light sources of an eye tracker. It is estimated that about 3-5% of people with epilepsy have this type of Photosensitive Epilepsy. Many people with Photosensitive Epilepsy experience an "aura" or feel odd sensations before the seizure occurs. If you feel odd during use, move your eyes away from the eye tracker.

2.8 Electricity

Do not open the casing of the Tobii I-Series device, since you may be exposed to potentially hazardous electrical voltage. The device contains no serviceable parts.

2.9 Child Safety

The Tobii I-Series are advanced computer systems and electronic devices. As such they are composed of numerous separate, assembled parts. In the hands of a child certain of these parts have the possibility of being separated from the device, possibly constituting a choking hazard or another danger to the child.

Young children should not have access to, or the use of, the device without parental or guardian supervision.

2.10 Environmental Control

The GEWA Programmable IR Remote Control — Environmental Control Unit (ECU) is not to be relied on as the only method of interaction with IR controlled devices.

2.11 Gaze Interaction

Some people may experience a certain amount of fatigue (due to intentional eye focusing and hard concentration) or even a dryness of the eyes (due to less frequent blinking) when first getting used to Gaze Interaction. If you are experiencing fatigue or dry eyes start off slowly and limit the length of your Gaze Interaction sessions to your comfort level. Re-moisturizing eye drops can be helpful to combat dryness.
3 Overview of the Tobii I–12 and I–15

3.1 Key Features

The Tobii I-Series has several built-in features. Some of these come standard and some can be ordered as additional features.

**Standard features:** 2 x Camera, 1 x microphone, 2 x speakers, 1 x ECU (Environmental Control Unit), 1 x Bluetooth® (for mobile phones etc) and 1 x WLAN (Wireless Local Area Network)

**Radio Frequency (RF) Free features:** Standard features: 2 x Camera, 1 x microphone, 2 x speakers and 1 x ECU (Environmental Control Unit)

**Additional feature:** Gaze Interaction.

The additional feature can be purchased with the initial order or as an additional Tobii Product Key after delivery, except for Gaze Interaction for the type I–12 R which needs to be sent in to Tobii for upgrade. To order a Tobii Product Key or Gaze Interaction for the type I–12 R, please contact Tobii Customer Service, your re-seller or your sales representative.

3.2 Product Layout

A Tobii I-Series device has a color Capacitive touch, LED Backlight screen. The Tobii I–12 has a 12.1” screen with a 1024 x 768 pixel resolution. The Tobii I–15 has a 15.0” screen with a 1024 x 768 pixel resolution.

3.2.1 The Tobii I–12 and Tobii I–15
### 3.2.2 Ports, Sensors and Device Buttons

</table>
Never force a connector into a port. If the connector and port do not join with reasonable ease, they probably do not match. Make sure that the connector matches the port and that you have positioned the connector correctly in relation to the port.

Be extra careful with the USB connectors.
3.3 Preinstalled Software

The Tobii I-Series device is delivered with all preordered and required software installed and ready to use. Should a reinstallation become necessary at any stage perform a Factory Recovery. For more information, see 5.11 Performing a Factory Recovery, page 33.

The product number for Windows® can be found on the back of the Tobii I-Series device.

3.4 Configuring the Device

Use the preinstalled Tobii I-Series Control Center to configure the hardware functions on the device. You can access Tobii I-Series Control Center in one of the following ways:

- Double-click on the Tobii I-Series Control Center shortcut on the desktop.

or

1. Go to Start menu > Control Panel.

2. Double-click Tobii I-Series Control Center, if the Control Panel is in Classic View.

If the Control Panel is in Category view, select View by: > Small icons or Large icons, and Double-click Tobii I-Series Control Center.

or

1. Go to Start menu > All Programs > Tobii > Tobii I-Series > Tobii I-Series Control Center.

2. Click Tobii I-Series Control Center.
In the list to the left, select which hardware configuration you want to change. In the area to the right, the different settings will be revealed. The changes are instantly executed.

For more information about configuring the Tobii I-Series with the Tobii I-Series Control Center, see 6 Configuring the Tobii I-Series with the Tobii I-Series Control Center, page 35.

Anywhere you see this icon, an information box is displayed when you briefly rest the mouse pointer on the icon or by touching the icon on the screen.

3.5 Accessing the microSD-Card

The microSD-Card (position 28 in Figure 3.2 Bottom, Left and Right Side, page 11) is installed in the Tobii I-Series device by default.

3.5.1 Removing the microSD-card

To remove the microSD-card:

1. Place the Tobii I-Series device face down on a flat surface.
2. Use a Phillips screwdriver to remove the screw that fastens the lid in place.
3. Remove the lid.
4. Press to release the microSD-card.
5. Pull the card out of the socket.
6. Replace the lid.
7. Tighten the screw with a Phillips screwdriver to fasten the lid in place.
3.5.2 Inserting the microSD-Card

To install the microSD-card:

1. Place the Tobii I-Series device face down on a flat surface.
2. Use a Phillips screwdriver to remove the screw that fastens the lid in place.
3. Remove the lid.
4. Carefully push the microSD-card into the socket.
   
   ! Do not use force when pushing in the microSD-card. If the microSD-card and socket do not join with reasonable ease, they probably do not line up.

5. Replace the lid.
6. Tighten the screw with a Phillips screwdriver to fasten the lid in place.

3.6 Tobii Quick Release Adapter Plate

Tobii QR adapter plate has two sides:

Daessy

REHAdapt

Make sure the required side of the Tobii QR adapter plate is face away from the Tobii I-Series for the mounting system to use.
3.6.1 Mounting the Tobii QR Adapter Plate

To mount the Tobii QR adapter plate:

1. Place the Tobii I-Series device face down on a flat surface.
2. Select the required side of the plate, see 1.3.2 Mounted Use, page 4.
3. Place the plate onto the device with the required side facing away from the unit.
4. Tighten the three (3) screws using a Torx T20 screwdriver to fasten the plate to the unit.

3.6.2 Removing the Tobii QR Adapter Plate

To remove the Tobii QR adapter plate:

1. Place the Tobii I-Series device face down on a flat surface.
2. Use a Torx T20 screwdriver to remove the three (3) screws that fasten the plate to the unit.
3. Remove the plate.
4 Batteries in the Tobii I-Series

4.1 Batteries

The Tobii I-Series device has two battery compartments. The batteries are of the same size and capacity for both the Tobii I–12 and I–15, see Appendix E Technical Specifications, page 77.

![Battery with Indicator for Remaining Capacity](image)

**Figure 4.1** Battery with Indicator for Remaining Capacity

4.1.1 Hot Swappable

You can remove/replace one battery without switching off the Tobii I-Series device, providing that the remaining battery is sufficiently charged. The remaining battery requires being at least ~10% charged to maintain device operation.

![Info Symbol](image)

Please allow the Tobii I-Series device a few seconds to detect the newly inserted battery before removing the other battery.

4.2 Charging

The batteries shall only be charged using the included adapter, or by using the Tobii I-Series Table Charger (not included, separate purchase required). When the Tobii I-Series device is shut down and the adapter is plugged in, the charging of completely discharged batteries may take up to 5 hours. The device can be used while the batteries are being charged, though this may affect the time a battery takes to reach full capacity.

![Warning Symbol](image)

To be sure that charging takes place in both the Tobii I-Series device and when using the Tobii I-Series Table Charger, be sure to plug the adaptor into both the wall socket and the device or Charger BEFORE you insert the batteries.

![Info Symbol](image)

The batteries will only charge when its capacity is 95% or lower.

The expected battery lifetime is 500 charge/discharge cycles. After that, the capacity of the battery will decrease by about 20% in usage time.

For battery storage and charging temperatures, see 2 Safety, page 6.
4.2.1 Checking Charge Level

Click on the battery icon, in the Notification area to see the remaining charge of the battery, which is installed in the device.

![Notification area](image)

You may also, at any time, check the status of a battery by pressing the indicator button on the face of the battery. Five LEDs (light-emitting diodes) will indicate the remaining charge level. For example, three lit LEDs indicate a 60% remaining charge, see Figure 4.1 Battery with Indicator for Remaining Capacity, page 16.

When charging, the highest capacity LED indicator will be blinking.

- The lowest capacity LED indicator (the "20" LED), will also blink when the indicator button is pressed if the battery’s capacity has dropped below 10%. So don’t rely upon the blinking of the 20% indicator as a guarantee for charging.

If the batteries have been deeply discharged (this can happen by leaving an empty battery inserted in the Tobii I-Series device without the power adapter connected) you may not see any indication of charging when you reconnect the adapter properly to the Tobii I-Series device or the Table Charger. It may take some time (even up to 20 minutes) before you see an LED indication that any charging is taking place. The battery IS being charged during this duration though it is a recovery charge raising the level enough to begin normal charging.

4.3 Inserting and Releasing the Batteries

For safety reasons, the Tobii I-Series device is delivered without the batteries inserted. The batteries are delivered only partially charged. The Tobii I-Series device can be used right away. It is nevertheless recommended that the batteries are charged for at least two hours before using the device.

4.3.1 Inserting the Batteries

To insert the batteries:

1. Insert a battery in the battery compartment.
2. Press the battery until it locks in place. You should hear a click that confirms that the battery is in a locked place.

4.3.2 Releasing the Batteries

If the Tobii I-Series is in Upright orientation:

1. Press the battery slide lock to the side.
2. Pull the battery out (the battery will stop after ~ 1 cm / 0.4").
3. Push the battery up a little bit (Do not push the battery all the way in again).
4. Pull the battery out of the battery compartment.

If the Tobii I-Series is in Resting orientation:
1. Place the Tobii I-Series device face down on a flat surface.
2. Press the battery slide lock to the side.
3. Pull the battery out of the battery compartment.
5 Using the Tobii I-Series

No skill other than reading is necessary for setting up the Tobii I-Series device. Follow this User’s Manual and the Quick Start Manual.

5.1 Starting the Device

Start the device in one of the following ways:

- Press the power button on the right side of the device. (Position 9 in Figure 3.2 Bottom, Left and Right Side, page 11)
- Activate a configured Switch (see 6.3 Switches).

When you have started the device, the Power LED will shine blue or green depending on if the device is connected to AC or on batteries. For more information about the LED Behavior, see Appendix C Computer Device States of Operation, page 74.

5.1.1 Password Information

The Tobii I-Series device is configured to start up, using the operating system present, without a password. Though unusual, there are situations in which the password window could plausibly pop up; for example, when creating a new user in the operating system, when returning from the operating system’s sleep mode or when downloading software updates from the internet.

Creating a new windows user and downloading updates from the internet could possibly compromise the system and software settings of the operating system that have been set and installed at Tobii Technology.

Should the password window pop up, requiring a password, the default password on all Tobii I-Series devices is, ”Tobii” (case sensitive). In order to type in the password use the Windows On-Screen Keyboard or an external USB keyboard (not included).

If you decide to change the password, be sure to write it down in a safe place for later use.

Suggested place to keep new password: ________________________

Without the operating system’s access password, Tobii Support may be unable to assist you with any future difficulties.

5.1.2 Tobii I-Series Welcome Guide

When you start your Tobii I-Series Device for the first time you will be greeted by the Tobii I-Series Welcome Guide. The guide is a setup wizard that will walk you through some steps that will help you make the most of your device.

Follow the instructions and select on Next to get to the next page of the Guide.

5.2 Shutting Down the Device

The device should be shut down using one of the following ways:

- Use the start menu in Windows (recommended when possible).
- Press a configured Switch for two to seven seconds.

Pressing the Switch for more than 7 seconds will shut down the device immediately, disregarding any unsaved changes.

- Through the communication software installed on the device

Should you be unable to shut the device down using either of the above, you can hold the power button on the right side of the device down for seven seconds. The device will consequently shut down immediately, without waiting for open applications to close.

This will not work if the side buttons have been disabled in the Tobii I-Series Control Center. For more information, see 6.1.2 Disable All Buttons, page 36.

This is not considered a "clean" Windows shut down and is thus not recommended unless completely necessary.
5.3 Using Tobii Gaze Interaction

The Tobii I-Series operate with precision regardless of glasses, contact lenses, eye color or light conditions. Gaze Interaction enables you to control the computer with your eyes using either Gaze Enabled applications (like Tobii Communicator / DynaVox Compass) or through the two types of Tobii Windows Control. See 5.4.1 Windows Control Type, page 22.

5.3.1 Positioning

The Tobii I-Series is designed to work optimally when it is parallel to the user’s eyes at a distance of about 60 cm (23.5 inches), see Figure 5.1 Positioning, page 20.

![Figure 5.1 Positioning](image)

This means that for those users leaning sideways or those lying down the Tobii I-Series also needs to be tilted in order to keep the user’s eyes parallel to the screen and at the optimal distance, see Figure 5.2 Positioning when Users Leaning Sideways or Those Lying Down, page 20.

![Figure 5.2 Positioning when Users Leaning Sideways or Those Lying Down](image)

Make sure the user is placed comfortably in relation to the optimal positioning of, and distance from, the unit. Be aware also that the user’s comfort, as well as the Gaze Interaction performance, will be enhanced if the sun is not shining directly on the screen or into the user’s eyes.

The user should be positioned at the optimal distance to allow for the best possible Gaze Interaction.

5.3.2 Track Box

The Tobii I-Series allows for extensive Freedom of Head Movement. Once the Tobii I-Series is properly calibrated and placed in front of the user, no further adjustments are required.

The Tobii I-Series produces an industry leading sized track box with the approximate dimensions of 30 cm × 20 cm × 20 cm / 11.8 in × 7.9 in × 7.9 in (Width × Height × Depth). The Track Box is an invisible box positioned approximately 60 cm (23.5 in) straight out from a point just above the middle of the screen.

At 70 cm (27.5 in) the Tobii I-Series allows for lateral Freedom of Head Movement in an area of about 50 × 36 cm (20 × 14 in). In order to function properly for Gaze Interaction the user needs at least one eye in the track box at all times.
5.3.3 Track Status Viewer

Use the Track Status viewer (see 5.3.3.1 Showing Track Status, page 21 for more information on how to open the Track Status viewer) to help determine the optimal height and horizontal positioning for Gaze Interaction with the Tobii I-Series.

- Ideally, the two dots that represent the user’s eyes should be in the middle of the Track Status viewer.
- Use the distance meter on the right hand side of the Track Status viewer to determine the optimal distance the user should be from the Tobii I-Series.
- The white triangle in the distance meter should hover near the center, within the green, when the optimal distance from the Tobii I-Series is reached.

For information about calibration of the Tobii I-Series see 7.2 Calibration, page 49. Also check the lighting conditions, related to what is mentioned above, when calibrating.

5.3.3.1 Showing Track Status

The track status viewer is a window/dialog where you can verify that the Gaze Interaction recognizes your eyes and that you are well positioned in front of the device.

Open the track status viewer in one of the following ways:

- Open Tobii Gaze Interaction Settings > Calibration and select the Track status button.
- Right-click (long-hold finger on icon for touch screen right clicking) on the Tobii Gaze Interaction Settings icon, in the Notification area and select Show track status.

5.3.4 Positioning Guide

For extra assistance in positioning, there is a Positioning guide that will show itself automatically in the bottom-right corner of your monitor.

The Positioning guide is a visual guide that combines the function of the Track Status viewer with six different image based instructions to help the user with correct positioning.

The 6 instructions direct the user to:

1. Move head down.
2. Move head up.
3. Move head to the right.
4. Move head to the left.
5. Move head closer to the monitor.
6. Move head farther away from the monitor.

The **Positioning guide** will automatically disappear when the user’s positioning is improved in the way that is directed by the guide.

Some users may not want the **Positioning guide** to pop up every time their eyes leave optimal positioning.

To turn On or Off the automatic **Positioning guide**, see 7.6 System Settings, page 59

### 5.4 Using Windows Control

Windows Control allows you to access the desktop and all applications of your Windows computer with Gaze Interaction.

#### 5.4.1 Windows Control Type

Windows Control can be used in two different modes:

- **Gaze Selection**
- **Mouse Emulation**

To select which type of Windows Control you wish to use and to customize Windows Control:

- Open **Tobii Gaze Interaction Settings > Windows Control**, see 7.5 Windows Control, page 56
- Select your preferred type of Windows Control under **Windows Control Type**

#### 5.4.2 Starting and Disabling Tobii Windows Control

To start Windows Control, right-click on the **Tobii Gaze Interaction Settings** icon, in the Notification area and select **Enable Windows Control**.
Double-click on the **Tobii Windows Control** shortcut on the desktop, ![Desktop](image), This will immediately start Windows Control.

To disable Windows Control, right-click on the **Tobii Gaze Interaction Settings** icon, ![Eye Icon](image), in the Notification area and select **Disable Windows Control**.

You can also start Windows Control from Tobii Communicator / DynaVox Compass or alternative communication software, which has implemented the functions provided by the Tobii Eye Control SDK.

### Auto start

- Open Tobii Gaze Interaction Settings > Windows Control.
- Check the **Auto start windows control at boot** check box if you want Windows Control to auto start when the Tobii Gaze Interaction Software starts.

### 5.4.3 Using Gaze Selection

The Gaze Selection mode of Windows Control makes it possible for the user to control a standard Windows desktop operating system with a two step selection method which reduces the risks of unwanted clicks. It also prevents the following of the mouse cursor with your gaze as opposed to the controlling of it (there is no floating mouse cursor in Gaze Selection).

1. The first step is to select the desired Task from the docked Taskbar by looking at it.
2. The second step is to look at the desired portion of the screen (or icon on the screen) where you want to execute the Task. An automatic zoom function is enabled, ending in the selection of the icon or execution of the task.

All functions in Gaze Selection are Touch and Mouse enabled which makes it easier for a Caregiver or Assistant to help the user if needed. The Caregiver or Assistant can select a Function/Task or change the settings for the user much easier.

#### 5.4.3.1 Gaze Selection Taskbar

At the top of the Gaze Selection Taskbar there is a Track Status viewer. It allows you to verify that the eye tracker recognizes your eyes and that you are well positioned in front of the device.

The Task Buttons in the Gaze Selection Taskbar can be in three different modes as shown in **Figure 5.3 The Modes for the Gaze Selection Taskbar, page 24**.

- **Normal (Unselected)** - No Task Button for Gaze Selection is chosen.
- **Primary Selection (Blue/black)** - The marked Task Button is selected and the Task will be executed after the automatic zoom when the user looks at the desired position on the screen or icon on it. If the selection method is set to Switch in the Gaze Selection Settings Dialog, the chosen Task Button will still remain active after executing the Task.

  ![Normal Mode](image)

  The Functions Overlay Task will not perform any zooming. When selecting Functions Overlay with Primary Selection, the Functions Areas/Commands will be active but not visible.

- **Secondary Selection(Blue/white)** - Same as **Primary Selection** but with a higher precision. **Primary Selection** means that the zoom will progress deeper before the final execution of the Task, making the desired portion of the screen bigger and easier to select within. Activate this mode by resting your gaze on the Task Button until the color changes according to the image below.

  ![Secondary Mode](image)

  The Functions Overlay Task will not perform any zooming. When selecting Functions Overlay with Secondary Selection, the Functions will be active and the areas of each Function will be visible to the user.

The Functions Overlay will not perform any zoom, some other tasks won’t either in some situations (scroll, settings, keyboard).
### 5.4.3.2 Task Buttons

<table>
<thead>
<tr>
<th>Task Button</th>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
</table>
| ![Gaze Drag & Drop](image) | Gaze Drag & Drop | Task that performs two "clicks", where the first one represents the starting position for the drag and the second the drop position (to move objects or select areas).  
- Select the Task  
- Look at the object you want to move or the starting point for the area selection  
- Execute the Gaze Selection (first "click") by Switch or Gaze  
- Look immediately at the drop position for the object or end point for the area selection.  
- Execute the second "click" by Switch or Gaze |
| ![Gaze Scroll](image) | Gaze Scroll | Task that, if performed on a scrollable window, enables a gaze-controlled way to scroll the page  
- Select the Task  
- Look at any scrollable area and hold your gaze, the Gaze Scroll icon will appear where you looked  
- Look above the icon to scroll up  
- Look below the icon to scroll down  
- Look to the left of the icon to scroll left  
- Look to the right of the icon to scroll right  
- While scrolling, look back at the icon (on the screen, not the Taskbar icon) to toggle between up/down or left/right  
- Look back at the Gaze Selection Taskbar (or outside of the screen) to end scrolling  
- Use the Gaze Scroll Task to scroll vertically and horizontally in Modern UI apps and the Modern UI Windows Start Screen. |
5.4.3.3 Functions Overlay in Windows 7

When selecting the Functions Overlay with **Primary Selection**, the Functions will be active but not visible.

When selecting the Functions Overlay with **Secondary Selection**, the Functions will be active and the areas of each Function will be visible to the user.

The Functions Overlay will not perform any zoom.

<table>
<thead>
<tr>
<th>Functions</th>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>App Switcher</td>
<td>Function that opens the App Switcher bar, same as Alt-Tab command on a regular keyboard.</td>
</tr>
<tr>
<td></td>
<td>Hide Taskbar</td>
<td>Function that hides the Taskbar for Full Screen view. To Bring back the Taskbar, select ⬅️ or ➡️ depending on which side the Taskbar is located.</td>
</tr>
</tbody>
</table>
5.4.3.4 Selection Methods — Gaze and Switch

There are two methods to execute the chosen Task. The method of choice is set from within the Gaze Selection Settings Dialog, see 8 Gaze Selection Settings, page 61.

Before executing a selection you select a Task from the Taskbar to execute. Gaze at your chosen task until it is highlighted as "Selected" or "High Precision".

- **Gaze** - To execute the chosen Task, rest your gaze at the desired portion of the screen (or icon on the screen) where you want to execute the Task. An automatic zoom function is enabled, ending in the selection of the icon or execution of the task.
- **Switch** - Two different execution modes.
  - **Single activation of the Switch** - the zoom function will execute in the same way as with the Gaze method and according to the settings made in the Gaze Selection Settings Dialog, see 8 Gaze Selection Settings, page 61.
  - **Activate and hold the Switch** - the zoom function will zoom continuously and end only upon the release / deactivation of the switch.

The Functions Overlay will not perform any zoom.

When using the Gaze method, you have to look back to the Taskbar to select a new Task after the execution of the Task, even if it is the same as you have just used.

When precision is set to zero in Gaze Selection Settings - no zoom is performed. For more information, see 8 Gaze Selection Settings, page 61.

5.4.3.4.1 Sticky Tasks & Default Left Click / Tap for Switch

When using the Switch method, a feature is made use of called "sticky tasks". If a Task becomes "sticky" it means that you do not have to look back at the Taskbar if you want to repeat the execution of the selected Task, only if you want to change the Task to another.

When using the Switch method, the Left Click / Tap Task is "sticky" by default. This means that Left Click / Tap is always on and will always be activated by the activation of the switch, if nothing else is selected. If another Task is selected it will be active only once (for one selection) and then Gaze Selection will automatically default back to Left Click / Tap for the subsequent selections.

The exception to this is the Double Click Task; when it is selected when using Switch mode it will also become sticky, meaning that it will stay selected until another Task is selected (after which it will again default back to Left Click / Tap).

This allows for excellent use cases such as quick/continual surfing of the internet by activating the Switch and thus the Left Click / Tap Task once and then repeatedly selecting anything desired, without having to choose the Left Click /Tap Task again multiple times.

5.4.3.4.2 Activating a Task with a Keyboard button instead of a Switch

Selecting the “F12 Keyboard Button”, on an attached keyboard will activate a Task selection. It can be used in exactly the same way as a connected switch. For more information on Switches, see 5.4.3.4 Selection Methods — Gaze and Switch, page 26.
5.4.3.5 Gaze Keyboard

By selecting the Gaze Keyboard button on the Taskbar, the Gaze Keyboard will launch as an on-screen keyboard. The Gaze Keyboard will be positioned either at the top or at the bottom of the screen depending on where the user has placed the last mouse click (or last cursor position) before launching the Gaze Keyboard. The keyboard will place itself on the opposite side from where the mouse/cursor is.

The Gaze Keyboard consists of four keyboard pages in a rotating loop. The user can easily switch between the different keyboard pages by selecting the next page buttons located to the far left and right on all pages of the Gaze Keyboard.

The key on the keyboard where the user is looking will be indicated by a light frame around the character/function on the key.

While the user is typing, the last 5-10 characters will be displayed in blue on the indicated/highlighted key. This feature assists the user in easily spotting misspellings and reduces the need for looking at the actual spot where the text is inserted, thus increasing typing speed.

The four keyboard pages are:

- **Default Startup Page**

- **First Page to the Right**

- **Second Page to the Right or Left**

---

**Figure 5.4** Default Startup Page

**Figure 5.5** First Page to the Right

**Figure 5.6** Second Page to the Right or Left
The Shift, Ctrl, Alt, Win and Alt Gr keys will become “sticky” once selected. This means that they will stay selected until the user selects a new key from the keyboard. They will stay sticky if the next selected key is another sticky key.

To write a letter with an accent:
1. Select the accent
2. Select the character
3. The character will appear with the chosen accent.

To delete a full word at a time instead of one character at a time:
1. Select the Ctrl key
2. Select the Backspace key

5.4.3.6 Gaze Selection in Combination with Region Based Keyboards

Gaze Selection can be used in combination with other eye controlled applications. "Gaze Enabled" regions in other applications are active as long as there is no active Task in the Gaze Selection Toolbar. If you are using Gaze Selection with switch the Task Buttons will be “sticky”, if you need to deselect a Task just look back at the selected Task for a short moment.

5.4.4 Using Mouse Emulation

The Mouse Emulation mode makes it possible for the user to emulate and control a standard PC mouse pointer on the screen.

To configure the Mouse Emulation, go to Tobii Gaze Interaction Settings. For more information, see 7.5.2.2 Mouse Emulation, page 57

5.4.4.1 Placing the Mouse Emulation Menu

The menu can be placed anywhere on the desktop or docked along the edge of the screen. You dock the Mouse Emulation Menu by dragging it to the edge of the screen. You can also do this by pressing and dragging the Move icon . When the menu is docked you have to look outside the screen to bring up the Mouse Emulation Menu items.
If the Mouse Emulation Menu is docked at the same side as the System Off-Screen Menu (For more information, see 5.6 Pause/Resume Gaze Interaction and Put the Tobii I-Series to Sleep with Gaze Interaction, page 31), the Mouse Emulation Menu might not function at all.

5.4.4.2 Clicking with Windows Control in Mouse Emulation Mode

Select what type of mouse click you want to perform from the Button drop down list in the Mouse Emulation Menu.

- Right-click simulates a right mouse click.
- Left-click simulates a left mouse click.

5.4.4.3 Magnifying with Windows Control in Mouse Emulation Mode

To use the magnifier, select the magnifier icon, , in the Mouse Emulation Menu.

If you want to perform a click with the magnifier:

1. Select the magnifier.
2. Select the other options as usual. The options will now have changed to reflect the magnification state.

- Right Click Zoom
- Left Click Zoom

5.4.4.4 Selecting Mouse Emulation Functions

You can set different functions for clicking:

- Mouse cursor
- No cursor movement on screen
  - Single-click
  - Double-click
- Drag and drop

5.4.4.5 Pausing Windows Control in Mouse Emulation Mode

To pause Windows Control select the Pause icon in the Windows Control Menu.

- Pause

Pausing Gaze Interaction can also be accomplished by looking at (about) the Tobii logo at the bottom of the Tobii I-Series, then selecting, using Gaze Interaction, the pause icon that pops up.

For more information, see 7.6.1 System Off-Screen Menu, page 59
5.4.4.6 Scrolling with Windows Control in Mouse Emulation Mode

The scroll buttons appear automatically in the upper right corner in any object which can be scrolled. The buttons will only appear on the window which has focus. To activate the scroll select the or \( \Rightarrow \) icon. If the icons show up when they are not desired you can use the icon to hide them.

When scroll mode is activated you will see a shaded gradient over the window which will be scrolled.

To scroll, look in the direction you want to scroll.

To toggle between left/right or up/down scroll, select the or \( \Rightarrow \) icon for the desired direction.

Scroll functionality can be turned off in Tobii Gaze Interaction Settings > Windows Control > Turn off scroll functionality.

5.5 Wake the Tobii I-Series from Sleep with Gaze Interaction

It is possible to wake the Tobii I-Series from sleep with Gaze Interaction. This makes it possible for the user to be more independent and secure while alone or without a caregiver; during the night for example. If the user wants attention from the caregiver
when the user wakes at night, the user could wake the Tobii I-Series with Gaze Interaction and use the Tobii I-Series to communicate quickly to alert the caregiver. Waking the device from sleep in this way is called: **Wake-on-Gaze®**

To **Wake-on-Gaze®**:

1. Make sure the Wake-on-Gaze® is activated, see 6.4 **Wake-on-Gaze®**, page 39.
2. Look at the area in between the two illuminators of the Eye Tracker at the bottom of the Tobii I-Series, see Figure 5.8 **Wake-on-Gaze® Area**, page 31.

  The Eye Tracker will search for the users eyes every 3 seconds.

The Tobii I-Series will wake up from Sleep and will be ready to use.

### 5.6 Pause/Resume Gaze Interaction and Put the Tobii I-Series to Sleep with Gaze Interaction

While using Gaze Interaction it is possible to both Pause/Resume Gaze Interaction (if the user wants to rest their eyes for a while) and to put the Tobii I-Series to Sleep (to reduce battery consumption, or in situations where the device is not needed). Putting the device to sleep in this way is called **Sleep-on-Gaze.**

To **Pause Gaze Interaction**:

1. Make sure the **Pause/Resume** System Off-Screen menu is activated, see 7.6.1 **System Off-Screen Menu**, page 59
2. Look at the area where the System Off-Screen menu has been configured for your Tobii I-Series, see Figure 5.9 System Off-Screen Area, page 31
   For more information and for how to configure the System Off-Screen menu, see 7.6.1 System Off-Screen Menu, page 59.

3. Selecting, using Gaze Interaction, the (Pause) icon that pops up.

To Sleep-on-Gaze:
1. Make sure the Sleep-on-Gaze function is activated, see 6.4 Wake-on-Gaze®, page 39
2. Look at the area where the System Off-Screen menu has been configured for your Tobii I-Series, see Figure 5.9 System Off-Screen Area, page 31
   For more information and for how to configure the System Off-Screen menu, see 7.6.1 System Off-Screen Menu, page 59.
3. Selecting, using Gaze Interaction, the (Sleep-on-Gaze) icon that pops up.
4. Select Yes for Sleep or No for Cancel

5.7 Using the Cameras
The two built-in cameras allows you to take snapshots of items in front of the Tobii I-Series device and also from the display side.
   Use Tobii Communicator / DynaVox Compass or other relevant software to operate the cameras.

5.8 Using the GEWA Programmable IR Remote Control
The Tobii I-Series device includes a GEWA Programmable IR Remote Control — Environmental Control Unit (ECU) with two (2) filter windows:
- 1 Transmitter filter window — Position 6 in Figure 3.1 Front and Back, page 10
- 1 Transmitter and Receiver filter window — Position 27 in Figure 3.2 Bottom, Left and Right Side, page 11

Use the Transmitter and Receiver filter window (position 27 in Figure 3.2 Bottom, Left and Right Side, page 11) when programming the GEWA Programmable IR Remote Control in Tobii Communicator / DynaVox Compass.

The GEWA Programmable IR Remote Control is a programmable Infrared device that can be used to control equipment with an IR Remote Control such as TV-sets or DVDs.
For more information about how to use and program the GEWA Programmable IR Remote Control, see the Getting Started with Essentials for Communicator 4 or the Compass User Guide.

If the device you are trying to control is not responding, try tilting the Tobii I-Series device up or down slightly to change the angle at which the IR signal is being sent.

The ECU is not to be relied on as the only method of interaction with IR controlled devices.

5.8.1 Handling Tobii Product Key
To use the GEWA Programmable IR Remote Control, a Tobii Product Key is required. To view or enter a Tobii Product Key, go to the Tobii Product Key section in the Tobii I-Series Control Center. See 6.7 Tobii Product Key, page 43

When the Tobii Product Key is in place, the GEWA IR Programmable Remote Control is ready to use.

5.9 Adjusting the Volume
To adjust the volume use the Volume Up button (Position 11) and volume down button (Position 12) on right hand side of the Tobii I-Series device. For position references, see Figure 3.2 Bottom, Left and Right Side, page 11
5.10 Adjusting the Sound

You can configure the built-in speakers using the Windows 7 Control Panel > Hardware and Sound.

We refer to Microsoft’s information on how to configure the sound in the Windows 7 Control Panel.

Sound adjustments can also be done in Tobii Communicator / DynaVox Compass.

5.11 Performing a Factory Recovery

Every Tobii I-Series device has a factory image stored on the disk. If you need to restore the device back to its original state, this can be done by using our OEM Factory Recovery Application.

This will delete any personal data or software installed after the device was delivered.

Factory Recovery means that the device will be reset to the factory mode, without anything installed. In this mode you have to re-enter your Tobii Product Key and licenses to perform the SW installation you have ordered.

Make sure you’ve connected the Power Supply before you start the process - do not run the device on batteries, as it might run out of power during the Factory Recovery. In such a scenario, you might have to send the unit back to Tobii for repair.

To perform a Factory Recovery for your Tobii I-Series device, follow this procedure:

1. Backup your personal data such as documents and Tobii Communicator / DynaVox Compass settings etc.
2. Make sure you have the Tobii I-Series Product Key available
3. Shut down the device
4. Connect a keyboard
5. Start up device again
6. Hold down the (Arrow Down) keyboard button continually during startup until you get into “Windows Boot Manager”
7. Select “Factory Reset” and press the (Enter) keyboard button.
8. The Tobii I-Series Software Installation dialogue will be loaded
9. Follow the instructions on the screen. These steps are identical to the initial setup you did when you first received the device.

or

To perform a Factory Recovery for your Tobii I-Series device, follow this procedure:

1. Backup your personal data such as documents and Tobii Communicator / DynaVox Compass settings etc.
2. Make sure you have the Tobii I-Series Product Key available
3. Shut down the device
4. Connect a keyboard
5. Start up device again
6. Hold down the \texttt{F8} \begin{tabular}{c} F8 \end{tabular} keyboard button continually during startup until you get into “Advanced Boot Options”

7. Press the \texttt{Esc} \begin{tabular}{c} Esc \end{tabular} keyboard button to get to the “Windows Boot Manager”

8. Select "Factory Reset" and press the \texttt{Enter} \begin{tabular}{c} Enter \end{tabular} keyboard button.

9. The Tobii I-Series Software Installation dialogue will be loaded

10. Follow the instructions on the screen. These steps are identical to the initial setup you did when you first received the device.

The Factory Recovery process will now start. This will take about 40 minutes. After the restore process is finished, the device will be reset to its original image as it was when you first received it from Tobii. If you have installed any additional Software or Tobii Product Keys after you ordered the device, these will have to be manually installed again.

\subsection*{5.12 Calibrating the Touch Screen}

There are two ways of calibrating the Touch Screen depending on if the Windows Control Panel is in Category view or Classic view with Small/Large icon.

To calibrate the Touch screen from Category View in Windows Control Panel, follow this procedure:

1. Select Start > Control Panel
2. Select Hardware and Sound
3. Select Tablet PC Settings
4. Select the \texttt{Calibrate}... button under Display options
5. Follow the on-screen instructions

To calibrate the Touch screen from Classic View with small/Large icons in Windows Control Panel, follow this procedure:

1. Select Start > Control Panel
2. Select Tablet PC Settings
3. Select the \texttt{Calibrate}... button under Display options
4. Follow the on-screen instructions
6 Configuring the Tobii I-Series with the Tobii I-Series Control Center

The Tobii I-Series Control Center is the program on your Tobii I-Series Device where you can access and change the settings that you have chosen during your first setup with the Tobii I-Series Welcome Guide. You can also run the Welcome Guide again at any time of your choosing.

To open the Tobii I-Series Control Center:

- Double-click on the Tobii I-Series Control Center shortcut on the desktop.
- or
- 1. Go to Start menu > Control Panel.
- 2. Double-click Tobii I-Series Control Center, if the Control Panel is in Classic View.
- If the Control Panel is in Category view, select View by: > Small icons or Large icons, and Double-click Tobii I-Series Control Center
- or
- 1. Go to Start menu > All Programs > Tobii > Tobii I-Series > Tobii I-Series Control Center.
- 2. Click Tobii I-Series Control Center,
- or
- • Through the communication software installed on the device
6.1 Buttons

You can create shortcuts to tasks, called actions, by programming the Quick Access buttons. The Quick Access buttons are located on the left side of the Tobii I-Series device, named 1, 2 and Menu.

For more information about how to program an action for a button, see 6.10 Creating Shortcuts to Actions, page 47

6.1.1 Play Sound when Pressed

To enable Play sound when pressed:
1. Open the Tobii I-Series Control Center > Button.
2. Select the Play sound when pressed check box to allow Audio feedback when the button is activated.

To disable Play sound when pressed:
1. Open the Tobii I-Series Control Center > Button.
2. Select to clear the Play sound when pressed check box.

6.1.2 Disable All Buttons

To avoid unintentional actions, all buttons on the Tobii I-Series device can be disabled.

To Disable all buttons:
1. Open the Tobii I-Series Control Center > Button.
2. Select the Disable All Buttons check box.
   - The Power button will work for starting the device even if all buttons are disabled.

   - Pressing the Power button for more than 7 seconds will shut down the device immediately, disregarding any unsaved changes, even if all buttons are disabled.

To Enable all buttons:
1. Open the Tobii I-Series Control Center >Button.
2. Select to clear the Disable All Buttons check box to allow all buttons again.
6.2 Display

6.2.1 Brightness Adjustment

There is a sensor on the device which will automatically adjust the screen brightness according to the surrounding light, relative to the selected level from Windows®.

To disable Automatic Brightness Adjustment:

1. Open the Tobii I-Series Control Center > Display.
2. Select to clear the Enable automatic brightness adjustment (recommended) check box.

To enable Automatic Brightness Adjustment:

1. Open the Tobii I-Series Control Center > Display.
2. Select the Enable automatic brightness adjustment (recommended) check box.

To manually adjust Brightness:

1. Open the Tobii I-Series Control Center > Display.
2. Select the Windows Power Options link.
3. Make the Brightness adjustments

Using a darker setting can improve battery runtime.

6.2.2 Display Rotation

The display can rotate automatically when turned 180 degrees, to facilitate using device in Upright orientation or Resting on the speakers.

With the Automatic display rotation activated, it could take a couple of seconds (the screen could also turn black) before the display is rotated.

To enable Automatic rotation according to device position:

1. Open the Tobii I-Series Control Center > Display.
2. Select the Automatic rotation according to device orientation radio button.
The external display will rotate when the Tobii I-Series is rotated if the Tobii I-Series is set up like this:

- External display connected via HDMI
- The Tobii I-Series is set to Automatic rotation in Tobii I-Series Control Center
- Dual screens is set to Clone/Duplicate mode in Windows

To be able to rotate the Tobii I-Series without rotating the external display, set the Dual screen to Extended mode in Windows. In Extended mode the rotation function is independent on each display.

To set Fixed device position:

1. Open the Tobii I-Series Control Center > Display.
2. Select the Fixed in upright orientation or the Fixed in resting orientation radio button.

Gaze Interaction is optimized to work properly in the Upright orientation.

For more information about Upright orientation and Resting orientation, see 1.3.1 Portable Use, page 3.

### 6.3 Switches

![Switches Settings](image)

You can enable the switches to act as power ON (see 6.3.2 Configuring a Switch to Power On, page 39) or OFF (see 6.3.3 Configuring a Switch to Power Off, page 39) button.

Select the **Play sound when pressed** checkbox to allow Audio feedback when the switch is activated.

Select actions for the switches by selecting **Set action**.

For more information about how to program an action for a Switch, see 6.10 Creating Shortcuts to Actions, page 47

#### 6.3.1 Play Sound when Pressed

To enable Play sound when pressed:

1. Open the Tobii I-Series Control Center > Button.
2. Select the **Play sound when pressed** check box to allow Audio feedback when the button is activated.

To disable Play sound when pressed:

1. Open the Tobii I-Series Control Center > Button.
2. Select to clear the **Play sound when pressed** check box.
6.3.2 Configuring a Switch to Power On

To enable a connected Switch to power on the device:
1. Open the Tobii I-Series Control Center > Switches.
2. Select the Enable switch “1 or 2” to act as Power On Button check box.

To disable a connected Switch to power on the device:
1. Open the Tobii I-Series Control Center > Switches.
2. Select to clear the Enable switch “1 or 2” to act as Power On Button check box.

6.3.3 Configuring a Switch to Power Off

To enable a connected Switch to power off the device:
1. Open the Tobii I-Series Control Center > Switches.
2. Select the Enable switch “1 or 2” to act as Power Off Button check box.

To disable a connected Switch to power off the device:
1. Open the Tobii I-Series Control Center > Switches.
2. Select to clear the Enable switch “1 or 2” to act as Power Off Button check box.

6.4 Wake-on-Gaze®

The Tobii I-Series device can be set to wake automatically from Sleep mode when your eyes are registered as looking at the display.

To enable Wake-on-Gaze for the device:
1. Open the Tobii I-Series Control Center > Wake-on-Gaze.
2. Select the Enable automatic Wake-on-Gaze check box.
3. Select Windows Power Options link to adjust the Power Options (if needed)

To disable Wake-on-Gaze for the device:
1. Open the Tobii I-Series Control Center > Wake-on-Gaze.
2. Select to clear the Enable automatic Wake-on-Gaze check box.
For information about how to use Wake-on-Gaze®, see 5.5 Wake the Tobii I-Series from Sleep with Gaze Interaction, page 30. 

The Tobii I-Series device can also be set to go to sleep using your gaze (to reduce battery consumption, or in situations where the device is not needed).

To enable Sleep-on-Gaze for the device:

1. Open the Tobii I-Series Control Center > Wake-on-Gaze.
2. Make sure Wake-on-Gaze is activated.
3. Select the Enable Sleep-on-Gaze check box.

To disable Wake-on-Gaze for the device:

1. Open the Tobii I-Series Control Center > Wake-on-Gaze.
2. Select to clear the Enable Sleep-on-Gaze check box.

For information about how to use Sleep-on-Gaze®, see 5.5 Wake the Tobii I-Series from Sleep with Gaze Interaction, page 30.

6.5 Wireless

6.5.1 WLAN

Not applicable for RF Free units.

The built-in WLAN (Wireless Local Area Network) support enables connection to wireless networks (such as Wi-Fi™ networks and access points) in compliance with the standard 802.11 b/g/n for both the I–12 and the I–15.

6.5.1.1 Handling Tobii Product Key

To be able to use WLAN communication, a Tobii Product Key is required. To view or enter a Tobii Product Key, go to the Tobii Product Key section in the Tobii I-Series Control Center. See 6.7 Tobii Product Key, page 43.

6.5.1.2 Enabling and Disabling the WLAN Communication

To enable WLAN communication:

1. Open the Tobii I-Series Control Center > Wireless.
2. Select the Enable Wireless Local Area Network (WLAN) check box.
To disable WLAN communication:

1. Open the Tobii I-Series Control Center > Wireless.
2. Clear the Enable Wireless Local Area Network (WLAN) check box or select the Disable all wireless units check box for disabling all wireless units.

### 6.5.1.3 Connecting to a WLAN

1. Click on the WLAN icon, , in the Notification area on the Desktop.
2. Select Connect to a network.
3. Select a network to connect to.

A wireless access point which supports antenna diversity is recommended when setting up a wireless network to use with a Tobii I-Series device, for reliable performance. Such access points are generally recognized by having two antennas on the router device.

Using an antivirus program is strongly recommended.

### 6.5.2 Bluetooth® for Mobile Phone Communication

Not applicable for RF Free units.

The built-in Bluetooth® enables connection to a mobile phone which complies with mobile Bluetooth® standards.

Only for use with Tobii Communicator for mobile phone communication.

For more information about how to use and program an Mobile phone to work with Bluetooth® on the Tobii I-Series device, see Getting Started with Essentials for Communicator 4.

For information about the Mobile phones that complies with the Tobii I-Series device, see www.tobii.com

#### 6.5.2.1 Handling Tobii Product Key

To use Bluetooth® communication in the device, a Tobii Product Key is required. To view or enter a Tobii Product Key, go to the Tobii Product Key section in the Tobii I-Series Control Center. See 6.7 Tobii Product Key, page 43

#### 6.5.2.2 Enabling and Disabling Bluetooth® Communication

To enable Bluetooth® communication:

1. Open the Tobii I-Series Control Center > Wireless.
2. Select the Enable Bluetooth check box.

To disable Bluetooth® communication:

1. Open the Tobii I-Series Control Center > Wireless.
2. Clear the Enable Bluetooth check box or select the Disable all wireless units check box for disabling all wireless units.

#### 6.5.2.3 Connecting to a Bluetooth® Device

For more information see Getting Started with Essentials for Communicator 4.
6.6 Safety

Upon starting the device for the first time, the safety settings in the Tobii I-Series Control Center will be a part of the Tobii I-Series Welcome Guide. To be able to run through the guide these safety settings must be confirmed. The safety settings exist for the safety of the customer. Be sure to read the safety details before accepting any changes.

6.6.1 Audio

Before you can use the speaker functionality and adjust speaker output settings you need to confirm the Audio safety details (if not already done during first start up).

To confirm:

1. Open the Tobii I-Series Control Center > Safety
2. Click on the Audio safety details text. A new dialog box opens and displays the safety text. Please read this thoroughly.
3. Select the I have read and understand the safety details and I want to enable the speaker functionality check box to confirm that you have read and understood the safety text.

6.6.2 Temperature Control

Before you can set the device usage in Tobii I-Series Control Center > Temperature Control you need to confirm the Temperature control safety details (if not done during first start up).

To confirm:

1. Open the Tobii I-Series Control Center > Safety
2. Click on the Temperature Control safety details text. A new dialog opens and displays the safety text. Please read this thoroughly.
3. Select the I have read and understand the safety details and I want to enable the temperature control functionality check box to confirm that you have read and understood the safety text.

You can use the device in a portable or mounted mode. Your choice will affect the maximum allowed device temperature. While having the device mounted, it is allowed to run at a higher temperature.

Both the I–12 and the I–15 can be used both as a portable and mounted device and can be operated in both portable and mounted mode.

If the device is gets overheated the device will shut down. It may take a while before it can be restarted as the unit may first need time to cool down. If the device is still too hot, the power button will flash purple for a couple of seconds when trying to restart the Tobii I-Series device. For more information, see Appendix C Computer Device States of Operation, page 74 and Table D.1 Maximum Allowed Temperature, page 76.
6.6.2.1  Device Usage

Specifying device usage mode takes place outside of the Safety settings but within Tobii I-Series Control Center.

To specify device usage:

1. Open the Tobii I-Series Control Center > Safety.
2. Click on preferred option for Device usage.
   - Portable — Portable mode sets the maximum device temperature shut down limit to a lower temperature, reducing the risk for permanent bodily harm caused by prolonged exposure to the skin
   - Mounted — Mounted mode sets the maximum device temperature to a higher temperature shut down limit

For more information, see Table D.1 Maximum Allowed Temperature, page 76

6.7  Tobii Product Key

The following features on the Tobii I-Series needs a licence for use:

- Eye tracker
- Bluetooth®
- WLAN
- IR
- Tobii Communicator
- DynaVox Compass

To view existing Tobii Product Key:

- Open the Tobii I-Series Control Center > Tobii Product Key.

If the symbol is visible after a feature, the Tobii Product Key(s) on the device are valid for that feature.

To add a Tobii Product Key:

1. Open the Tobii I-Series Control Center > Tobii Product Key.
2. In the Enter a Tobii product key box, type the new Tobii Product Key.

To type the Tobii Product Key use either a connected keyboard or enable the on-screen keyboard by selecting this button.
6.8 Setup & Updates

Manage Tobii applications related to setting up your device and updating to the latest software.

6.8.1 Tobii I-Series Welcome Guide

The Tobii I-Series Welcome Guide guides the user through the setup procedure, such as License Agreement and Safety Setting etc.

If the Tobii I-Series Welcome Guide is not finished, it will automatically start up next time the Tobii I-Series is powered up.

To run the Tobii I-Series Welcome Guide at next start up, follow these step:

2. Select the Run at next startup check box.

To run the Tobii I-Series Welcome Guide at once, follow these steps:

2. Select the Run now button.

6.8.2 Tobii I-Series Update Notifier

The Tobii I-Series Update Notifier is a program that notifies you when the latest software updates for your Tobii Software are available (either automatically, on a regular basis, or manually, at a time of your choosing) and assists you in installing the updates.

If you have chosen to "Enable automatic updates" in either the Tobii I-Series Welcome Guide or, later, in the Tobii I-Series Control Center, the Update Notifier will actively search Tobii’s sites for version Updates of your software.

To keep your Tobii I-Series device running properly it is highly recommended that you update your Tobii Software on a regular basis and it is therefore highly recommended that you enable automatic updates.

To Enable automatic search for updates:

1. Open the Tobii I-Series Update Notifier >> Setup & Updates.
2. Select the Enable automatic search for updates (recommended) check box.

If an update is found the following Update Notifier window will pop up:
The update or updates available will show themselves in the Step One window of Update Notifier as large button with a green check mark on the right side. You will also be able to see the version number of the software that you currently have and the version number of the update.

If you choose not to download one or more of the available updates you can click on the button of the update you do not want and the check mark will turn into a red "X" mark.

Proceed in the following way:

- Click the **Download** button to download the updates to your Device and continue to Step Two.
- In Step Two, Click the **Install** button to install the chosen updates on your device and proceed to Step Three.
- Step Three informs you that your system has been updated, select the **Done** button to close the Update Notifier.

If you choose not to "Enable automatic updates" you can still check for updates for your Tobii software and update them manually using the Tobii I-Series Update Notifier.

To open and activate the Tobii I-Series Update Notifier manually (this opens the Step One window shown above and starts the same automatic update process):

- Navigate in Windows from your desktop to **Start Menu > All Programs > Tobii > Tobii I-Series** and select the Tobii I-Series Update Notifier icon.

  or

1. Open the Tobii I-Series Control Center > Setup & Updates.
2. Select the **Run now** button.

### 6.9 System

#### 6.9.1 Version & Model

To view the version and model of the device:

- Open the Tobii I-Series Control Center > System.

Please have this information available if you have problems with the device and need to contact Customer Support.
To save the version and model of the device to a file:

1. Open the Tobii I-Series Control Center > System.
2. Select the Save information to file button.

You can attach the file containing all the information into a an e-mail.

6.9.2 Backup

This is a system backup specific to your Tobii software-related files. The device automatically and regularly, once a week, backs up the data that is associated with your Tobii communications applications (Tobii Communicator / DynaVox Compass Page Sets, files, settings, etc.), your Gaze Interaction files (profiles, calibration settings, interaction settings, etc.) and your device specific settings from the Control Center. You can manually start the backup below and/or restore the data from one of the three latest backups. Be aware that the changes made since the latest backup will be reverted if you choose to restore from a previous backup. All files in the My Documents folder will be backed up as well, if space is available on the microSD-card, as a second priority after the Tobii software-related files. To back up all files on your device please use Microsoft’s own Windows Backup and Restore application.

The backup process executes once a week (every Sunday at 15.00) and the three latest backups are saved on the microSD-card.

If your Tobii I-Series device is not up and running at this time the backup will be performed at next start up.

The process backs up files for all users. If the backup drive does not have enough space some files will not be backed up. Image files have the lowest priority (backed up last). The largest file size for the backup of individual files is 100 MB, files larger than this will be excluded.

The backup files are placed in the directory Q:\Backup\<date> (On the microSD-card).

Tobii will not take responsibility for any other data than the “Tobii applications data”

6.9.2.1 User Profile Card

The Tobii I-Series device comes with a 32 GB microSD-card installed. The purpose of this card is to backup personal settings and data. In the case of fatal damage to the Tobii I-Series device. The microSD-card can be removed and inserted into a new device for quick and easy retrieval and restoration of personal data and settings.

6.9.2.2 Backup Manually by the User

To perform a manual backup of the system:

1. Open the Tobii I-Series Control Center > System.
2. Select the Backup now button.

When the backup is finished, the following will show up on the screen: Backup finished.

6.9.2.3 Restoring Backup Files by the User

To restore one of the three last backup of the system:

1. Open the Tobii I-Series Control Center > System.
2. Select the Restore from backup button.
3. Select the one of the last backups by selecting the Restore from this backup button next to the date of the stored backup.

When the restore is finished, the following text will show up on the screen: Restore finished and the symbol will show up next to the date that was selected to restore from.
Copies of these backup files can be saved anywhere you wish, to an external hard drive, for example, or to a USB stick. Copy the folders in the directory Q:\Backup<date> to any external directory or drive of your choosing.

6.9.2.4 Backup Failed

One likely reason that the backup failed is that there are too many files in the My Documents folder. Try moving the files that are not backup-critical to another location (such as pictures, music files, etc).

6.9.3 Eye Tracker

To enable the Eye tracker:
1. Open the Tobii I-Series Control Center > System.
2. Select the Enable Eye Tracker check box.

To disable the Eye tracker:
1. Open the Tobii I-Series Control Center > System.
2. Clear the Enable Eye Tracker check box.

6.10 Creating Shortcuts to Actions

You can create shortcuts, called actions, by programming the Quick Access buttons and connected Switches. The Quick Access buttons are located on the left side of the Tobii I-Series device, named 1, 2 and Menu.

Switches are connected to the Switch connectors.

6.10.1 Available Actions

This is a short description of each action available to set:

- Send input – Allows the user to send input to an alternative program (keystroke, mouse click or text).
- Start Program – Allows the user to start a program.
- Volume – Allows the user to adjust the volume up or down or to set mute on or off.
- Backlight – Allows the user increase or decrease the backlight of the screen.
- Gaze Interaction – Allows the user to show and hide the track status window, calibrate or pause the Gaze Interaction ON or OFF.
- Wireless – Allows the user to either set all radio connections on or off, or a specific wireless connection.
- Tobii Communicator / DynaVox Compass — Actions are set and customized in Tobii Communicator / DynaVox Compass.

The available actions are the same for the Quick Access buttons and Switches.

To create a shortcut to an action:

1. Open the Tobii I-Series Control Center.
2. Select Buttons or Switches, depending on which one you want to customize.
3. Click Set action to view the dialog box where you can select the action you would like the button to perform. By selecting one of the actions, the options for this action will be revealed below the chosen action.

If you would like the Quick Access button to make a sound when pressed, select the Play sound check box after having set an action.
6.10.2 Selecting Actions

- **No Action Selected** — Default — choose to delete a previous set task
- **Send Input** — choose either to send a keyboard input, a mouse click or specified text by selecting the option you want the device button or Switch to perform.
  - **Send keyboard input** — In the Send keyboard input list, select the keystroke you want to send to an alternative program.
  - **Send mouse click** — In the Send mouse click list, select the desired mouse click: left, middle or right mouse click.
  - **Send text** — In the Send text box, type the text you want to send to an alternative program.
- **Start Program** — Click Browse the first time you are using this option to find and select a program. The next time you select the Start Program option a list of previously selected programs will be displayed. You can then directly select a program from the list or select Browse if you want to start a program not in the list.
  
  For the selected program it is possible to add program arguments. However, this is normally not required. If the program should require program arguments and you do not know what to enter, please contact the company you purchased the software from.
- **Volume** — choose to increase, decrease or mute the volume by selecting the preferred option.
- **Backlight** — choose to either increase or decrease the screen backlight by selecting the preferred option.
- **Gaze Interaction** — choose to toggle track status window, calibrate Gaze Interaction, Pause the Gaze Interaction or toggle Windows Control ON/OFF.

  To enable this option the Tobii I-Series device must have an Eye Tracker and the Tobii Gaze Interaction Software installed.

- **Wireless** — you can either set all radio connections on/off or each individual wireless unit on/off one by one, by selecting the options.
- **Tobii Communicator / DynaVox Compass** — Actions are set and customized in Tobii Communicator / DynaVox Compass

  If actions for a Switch are customized both in the Tobii I-Series Control Center and in Tobii Communicator / DynaVox Compass or in alternative communication software all actions will be performed simultaneously. Ensure that the specified action for a Switch does not conflict with an action set for the same Switch in Tobii Communicator / DynaVox Compass or in alternative communication software.

  To get back from slide in menus, just select the arrows in the greyed out areas.
7 Tobii Gaze Interaction Settings

7.1 Accessing the Tobii Gaze Interaction Settings

Tobii Gaze Interaction Settings is a program for quick and easy access to control functions such as Track Status, Calibration and common settings.

Start Tobii Gaze Interaction Settings in one of the following ways:

- Go to Start menu > All Programs > Tobii > Gaze Interaction > Tobii Gaze Interaction Settings.

- Double-click on the Tobii Gaze Interaction Settings icon, in the Notification area, or on the shortcut, on the Desktop (if one has been made).

- Right-click (long-hold finger on icon for touch screen right clicking) on the Tobii Gaze Interaction Settings icon, in the Notification area and then select Settings.

- Through the communication software installed on the device.

In the list to the left in Tobii Gaze Interaction Settings, select which option you want to change. In the list to the right, the available options will be revealed.

Click OK to save changes. This will also close Tobii Gaze Interaction Settings.

Click Cancel to cancel the changes. This will also close Tobii Gaze Interaction Settings.

Click Apply to save changes. Tobii Gaze Interaction Settings will remain open.

Anywhere you see this icon, there is an information box with additional information for the feature.

7.2 Calibration

This section will describe how to calibrate an individual, enabling optimal Gaze Interaction with the Tobii I-Series device.
7.2.1 Starting Calibration

The calibration can be started in one of the following ways:

- Open Tobii Gaze Interaction Settings > Gaze Interaction and then select the Start Calibration... button.
- Right-click (long-hold finger on icon for touch screen right clicking) on the Tobii Gaze Interaction Settings icon, in the Notification area and select Start Calibration.
- Through the communication software installed on the device.

7.2.2 Interrupting Calibration

Interrupt the calibration in one of the following ways:

- Press Esc.
- Left-click on the screen using a mouse.
- Touch the screen (on a touch screen device).

7.2.3 Customizing Active Eye

Based on certain conditions, or disabilities, you may only have one eye that functions well with Gaze Interaction. In this case, and if you know which eye is most functional, you can select which eye to track for Gaze Interaction.

To select the eye you want to be tracked by the eye tracker, follow these steps:

1. Open Tobii Gaze Interaction Settings > Calibration.
2. Select the Track only this eye for Gaze Interaction check box under Left or Right Eye Calibration Result box.
7.2.4 Improving Calibration Point(s)

After calibration, you may want to improve one or more points.

There is a color scheme used that will help you to understand the quality of your calibration.

All three color statuses are the result of a **successful** calibration.

- If the background color of the Calibration Result is light red, you have achieved a successful, but relatively low quality calibration. You can improve one or more points individually, or recalibrate completely, to achieve better Gaze Interaction results.

  Improving even one (or more) of the calibrations points can significantly improve the calibration.

- If the background color of the Calibration Result is light yellow, you have achieved successful and good quality calibration. You might be able achieve better Gaze Interaction results by improving one or more points individually.
- If the background color of the Calibration Result is green, you have achieved a successful and high quality calibration.

Be aware that no matter what quality of calibration you have achieved you will be able to select **OK** or **Apply** and begin using Gaze Interaction. It is the accuracy and functionality of the Gaze Interaction that is affected by the quality of the calibration results. Try for the best calibration possible.

**Remember!** In the end it is the personal experience that counts!

The closer the lines within the calibration point are to a dot in the center of the circle of the calibration point, the better the calibration is of that point. You can choose the points to be improved and calibrate only those points again.

To improve one or more calibration points, follow these steps:

1. Open **Tobii Gaze Interaction Settings > Calibration**.
2. Select the point(s) you want to improve under **Calibration Result**.
3. Select the **Improve Point(s)** button and a calibration for the selected point(s) will start.
7.2.5 Removing Calibration Point(s)

If there is a calibration point that is consistently bad after calibration (the green lines are scattered all around and outside the circle of the calibration point) you can remove that point completely from the calibration, this may improve the calibration of the other points. Be aware that if you remove a point, that area of the screen will be uncalibrated and Gaze Interaction will not function properly there.

To remove one or more calibration points, follow these steps:

1. Open Tobii Gaze Interaction Settings > Calibration.
2. Select the point(s) you want to remove under Calibration Result.
3. Select the Remove Point(s) button.

7.2.6 Customizing the Calibration

To customize the calibration, follow these steps:

1. Open Tobii Gaze Interaction Settings > Calibration.
2. Select the Settings... button

**General**

3. Select calibration background by selecting the background color button and select the desired color.
4. Specify the number of points you want to calibrate with (two, five or nine) from the Calibration points drop down list. The higher number of points, the more accurate the calibration.
5. Select if you want to have sound feedback or not from the Sound feedback drop down list.

**Stimulus**

6. Select the stimulus type from the Stimulus type drop down list. There are three types available, each with different customizing options:
   - **Dot:**
     - Select color of the dot by selecting the Stimulus color button.
     - Select size of the dot by selecting from the Stimulus size drop down list.
     - Select speed of the dot by selecting from the Stimulus speed drop down list.
   - **Image:**
– Select primary stimulus by selecting **Browse** and selecting an image.
– Select secondary stimulus by selecting **Browse** and selecting an image.
– Select size of the image by selecting from the **Stimulus size** drop down list.
– Select speed of the image by selecting from the **Stimulus speed** drop down list.

- **Video:**
  – Select primary stimulus by selecting **Browse** and selecting a video.
  – Select secondary stimulus by selecting **Browse** and selecting a video.
  – Select size of the video by selecting from the **Stimulus size** drop down list.
  – Select speed of the video by selecting from the **Stimulus speed** drop down list.

7. Check the **Animate stimuli** check box if you want the stimuli to be animated (as opposed to static).
8. If you want to control the calibration, i.e. decide when to move the calibration stimuli, with a keyboard, check the **Keyboard step-through** check box.
   - For **Keyboard step-through**, use the ‘S’ key to step (to move the calibration stimuli) and the ‘Esc’ key, the Left mouse button or touching the touch screen to interrupt calibration. When using Image or Video calibration, use the ‘T’ key to toggle between primary and secondary stimulus images.

To get back from slide in menus, just select the arrows in the greyed out areas.

### 7.2.7 Customizing the Calibration Area

![Calibration Area Settings](image)

Customizing the calibration area can be useful if you have discovered that the user cannot access certain areas of the screen using Gaze Interaction. By sizing the calibration area to exclude the areas that the user cannot access it can improve the overall calibration.

To customize the calibration area, follow these steps:

1. Open **Tobii Gaze Interaction Settings > Calibration**.
2. Select the **Settings**... button.
3. Select the Calibration area: **Change**... button.
4. A blue semi-transparent area is displayed on the desktop. You can move and resize the blue area to make it fit your preferred calibration area.

7.3 Interaction

To adapt the interaction method and visual feedback for Gaze Interaction, follow these steps:

1. Open Tobii Gaze Interaction Settings > Interaction.

Scope

If different settings are needed for different Gaze Interaction applications, make the adaptations here.

2. Select how the interactions settings should be reflected:
   - Select Default settings of the currently selected user profile if you want to apply the new settings to the whole user profile and not only to a particular application.
   - Select Application specific settings of the currently selected user profile if you want to apply the new settings to a specific application of a user profile. Then select the available application in the Application drop down list.

Method

3. Select the activation method from the Activation method drop down list. There are three methods available, each with different activation times:
• Dwell. Adjust the dwell time by moving the Dwell time slider.
• Switch. Adjust the minimum time for a click duration and the minimum time between clicks by moving the respective slider.
• Blink. Adjust the minimum and maximum duration for a blink by moving the respective slider.

**Visual Feedback**

4. Select the symbol for visual feedback from the Dwell feedback type drop down list.
5. Select the color of the feedback symbol in the Feedback color drop down list.
6. Specify the dot size and opacity of the feedback symbol by moving the respective slider.
7. Select the Show visible outline around the activated region check box to see a dashed line around the activated area in all instances of Gaze Interaction selection
8. Select Simulate activation if you want to see how the activation method will appear on the screen. The example is shown above the Simulate activation button.

### 7.4 User Profile

#### 7.4.1 Creating a New Profile

Use of different profiles allows you to store multiple people’s calibrations and feedback preferences on one device. Alternatively, one person might want to store multiple profiles for him/herself if that person wears glasses occasionally or uses multiple means of accessing the device.

To create a new profile:

1. Open Tobii Gaze Interaction Settings, select User Profiles.
2. Enter a new name in the Profile name field.
3. Select an existing profile in the Based on profile drop down list. The new profile will inherit all settings from the selected profile. Note that if no profiles have been created previously, the only one to select is the default profile.
4. Click Create to save the new profile. The new profile is saved directly upon selecting Create.
7.4.2 Selecting Current User Profile

To select current user profile:

1. Open Tobii Gaze Interaction Settings.
2. Select a user profile in the Current User Profile drop down list.
3. Select Apply

7.4.3 Deleting a Profile

To delete a profile:

1. Open Tobii Gaze Interaction Settings > User Profiles.
2. Select a profile in the Profile to delete drop down list.
3. Click Delete to delete the selected profile. The profile is deleted directly upon selecting Delete. Note that the default profile cannot be deleted.

7.5 Windows Control

Windows Control allows you to access the desktop and all applications of your Windows computer with Gaze Interaction.

7.5.1 Auto Start

To enable Windows Control automatically when the your device starts up:

• Select the Auto start Windows Control at boot check box.

To disable Windows Control automatically when the your device starts up:

• Select to clear the Auto start Windows Control at boot check box.

7.5.2 Windows Control Type

Select which type of Windows Control you wish to use:

• Gaze Selection — Select the Gaze Selection radio button. For more information about using Gaze Selection, see 5.4.3 Using Gaze Selection, page 23
• Mouse Emulation — Select the Mouse Emulation radio button. For more information about using Mouse Emulation, see 5.4.4 Using Mouse Emulation, page 28
7.5.2.1 Gaze Selection

The settings for Gaze Selection are found in the Gaze Selection Taskbar, docked to the screen when Gaze Selection Windows Control is running. Gaze at the settings icon to select it and the Gaze Selection Settings will open. For information about the Gaze Selection Settings, see 8 Gaze Selection Settings, page 61

7.5.2.2 Mouse Emulation

7.5.2.2.1 Mouse Control Speed

Customize the mouse control speed by moving the Mouse control speed slider. Move the slider to the right to increase the speed and to the left to decrease it.
7.5.2.2 Magnifier Size and Zoom

Customize the size of the magnifier by moving the Magnifier Size slider. Move the slider to the right to increase the size and to the left to decrease it.

Customize the zoom factor by moving the Zoom Factor slider. Move the slider to the right to increase the zoom factor and to the left to decrease it.

7.5.2.3 Auto Switch from Right to Left Click

Check this check box if you want Windows Control Mouse Emulation mode to automatically switch the desired mouse click selection back to a left click, after a right click, has been chosen and performed.

7.5.2.4 Turn off Scroll Functionality

Check the Turn off scroll functionality check box if you do not want Gaze Interaction scrolling to be active.

7.5.2.5 Custom Cursors

Custom cursors is a feature that turns the regular mouse cursor into a number of different cursors when using Windows Control in Mouse Emulation mode.

The different cursors visually represent the type of "mouse click" for Gaze Interaction that you have chosen from the Mouse Emulation Menu (for the definitions of the Mouse Emulation Menu symbols see 5.4.4.2 Clicking with Windows Control in Mouse Emulation Mode, page 29, 5.4.4.3 Magnifying with Windows Control in Mouse Emulation Mode, page 29 and 5.4.4.4 Selecting Mouse Emulation Functions, page 29).

Check the Custom cursors check box to activate custom cursors for Windows Control in Mouse Emulation mode.

7.5.2.6 Hide Menu

Check the Hide Menu check box if you want the Mouse Emulation menu to be hidden during use. The F2 key on the keyboard can also be used to toggle On and Off (hide/show) the Mouse Emulation Menu instantly during use.
7.6 System Settings

7.6.1 System Off-Screen Menu

Select the Position Drop down menu to make changes to where the System Off-Screen menu appear on the screen.

The System Off-Screen menu can be set to appear:

- Bottom (Default)
- Top
- Left
- Right
- None

Set the System Off-Screen menu to None to disable the System Off-Screen menu.

Figure 7.1 System Off-Screen Menu Areas

7.6.2 Positioning Guide

To turn On the Positioning Guide:

1. Open Tobii Gaze Interaction Settings > System Settings.
2. Select the **Enable positioning guide** check box.

To turn **Off** the Positioning Guide:

1. Open **Tobii Gaze Interaction Settings > System Settings**.
2. Select to clear the **Enable positioning guide** check box.

For more information about the Positioning Guide, see **5.3.4 Positioning Guide**

### 7.7 System Information

To view the version and model of the device:

Open the **Tobii Gaze Interaction Settings > System Information**.

Please have this information available if you have problems with the device and need to contact Customer Support.

By clicking **Copy all information** you can paste the information into a document (such as Notepad or WordPad) or directly into an e-mail.

#### 7.7.1 Upgrade Eye Tracker Firmware

If there is a new Firmware for the **Eye Tracker** module, the **Upgrade** button will be selectable.

Select the **Upgrade** button to start upgrading the Firmware for the **Eye Tracker**.

A Pop up notification will be shown when starting the Gaze Interaction Settings if there is a Upgrade for the **Eye Tracker** Firmware.
8 Gaze Selection Settings

The Gaze Selection Settings Dialog is controlled by Gaze Interaction and the user can make all changes without using a keyboard and/or a mouse.

8.1 The General Settings Tab

Selection
- **Gaze** - Choose Gaze to use your gaze position to activate the zooming function that ends with the execution of the desired Task.
- **Switch** - Choose Switch to use a switch to activate the zooming function that ends with the execution of the desired Task.

Precision
The zoom precision can be set to 8 different levels, just look at the desired position to change the setting. Changing the Precision will adjust how deep the zoom will go before executing the Task. The further to the right on the scale the deeper the zoom.

If the Precision is set to zero, no zooming will happen. It will be an instant click with Primary Selection. With Secondary Selection it will still be a zoom.

Speed
The zoom speed can be set to 8 different levels, just look at the desired position to change the setting. Changing the Speed will affect how fast the zoom is before the execution of the Task. The further to the right on the scale the faster the zoom.
8.2 The Keyboard Settings Tab

Keyboard layout
The selected language keyboard layout is shown. Select the Change button to change the keyboard layout to another language. There are a number of different language keyboard layouts available.

Gaze typing speed
The Gaze typing speed can be set to 8 different levels, just look at the desired position to change the setting. Changing the Gaze typing speed will adjust how long the user must fix their gaze on a button before the Task is executed. The scale presents lower Gaze typing speeds to the left and higher to the right.

Sound feedback
- On - Choose On to activate sound feedback when selecting a button on the Gaze keyboard.
- Off - Choose Off to deactivate sound feedback when selecting a button on the Gaze keyboard.

To finish, select OK to save or Cancel to abort your changes.

8.3 The Taskbar Settings Tab

Select which tasks to use on the Taskbar. For more information about the tasks, see 5.4.3.2 Task Buttons, page 24.

Be aware that the more Tasks used on the Taskbar the more difficult they might become to select on smaller screens.

Toggle the On/Off check box to On for each Task to enable it for use on the Taskbar.
Toggle the On/Off check box to Off for each Task to disable its use and visibility on the Taskbar.

8.3.1 Maximize Left Click/Tap

Use the Maximize Left Click/Tap feature to expand and emphasize the Left Click/Tap Task on the Taskbar. If it is toggled to Off, all selected Tasks will be spaced evenly along the Taskbar. If it is toggled to On, all Tasks other than Left Click/Tap will retain their original/smaller sizes and the Left Click/Tap Task will fill the remaining space on the Taskbar. Activating this feature can greatly expand the active region of the Left Click/Tap Task making it much easier to select.
9 Product Care

9.1 Temperature & Humidity

9.1.1 General Use

The Tobii I-Series is best kept in dry conditions at room temperature. The recommended range for temperature and the humidity value for the device is as follows:

Portable mode:
- Ambient temperature: 0°C to 30°C (32℉ to 86℉)
- Humidity: Max 70% (no condensation on the device)

Mounted mode:
- Ambient temperature: 0°C to 40°C (32℉ to 104℉)
- Humidity: Max 70% (no condensation on the device)

9.1.2 Transportation and Storage

For transportation and storage excluding batteries the recommended range for temperature and the humidity value for the device is as follows:

- Temperature: -40°C to 70°C (-40℉ to 158℉)
- Humidity: 20% to 70% (no condensation on the device)

The Tobii I-Series is not waterproof or fully water resistant. The device should not be kept in excessively humid, damp or otherwise wet conditions. Do not submerge the device in water or in any other liquid. Be careful not to allow liquids to be spilled upon the device especially in the connector areas without the I/O covers in place (Position 29 in Figure 3.2 Bottom, Left and Right Side, page 11). The device is registered as IP Class 43 (with I/O covers in place).

9.2 Cleaning

Before cleaning the Tobii I-Series device shut it down, unplug all cables, attach the I/O covers (Position 29 in Figure 3.2 Bottom, Left and Right Side, page 11) and remove the batteries. Use a soft, slightly damp, lint-free cloth or Alcohol Cleaning Wipes (i.e. damp cloth with 96% alcohol). Avoid getting moisture in openings on the device. Don’t use window cleaners, household cleaners, aerosol sprays, solvents, alcohol, ammonia, or abrasives to clean the device.

9.2.1 Cleaning of the Speakers

If the openings for the speakers are clogged carefully use cotton sticks and/or a toothbrush to avoid damaging the IP-protection for Tobii I-Series speakers.

9.3 Placement

Only use the recommended mounts specified by your local reseller or sales represent and make sure that they are mounted and fastened correctly according to the instructions. Do not place the device on unstable and uneven surfaces.

9.4 Transporting the Tobii I-Series Device

Disconnect all the cables and use the handle on the back side of the device to hold the device while carrying it. When you transport the device for repair, shipment or traveling, use the original casing and packaging materials.

Keep the original packaging materials for the Tobii I-Series.

In case the device needs to be returned to Tobii for Warranty related issues or repair, it is required that the original packaging (or equal equivalent) is used for shipping.
9.5 Disposing of the Batteries

Do not dispose of the batteries in general household or office waste. Follow your local regulations for the disposal of batteries.

9.6 Disposing of the Tobii I-Series Device

Do not dispose of the Tobii I-Series Device in general household or office waste. Follow your local regulations for the disposal of electrical and electronic equipment.
Appendix A  Support, Warranty, Training Resources

A1  Customer Support

For support, please contact your local representative or Support at Tobii. In order to receive assistance as quickly as possible, make sure you have access to your Tobii I-Series device and, if possible, an Internet connection. You should also be able to supply the serial number of the device, which you find on the back of the device, in the Tobii I-Series Control Center or Tobii Gaze Interaction Settings, see 6.9 System, page 45 and 7.7 System Information, page 60.

For further product information and other support resources, please visit the Tobii website www.tobii.com.

A2  Warranty

Please read the Manufacturer’s Warranty paper included in the package.

Please read this User’s Manual carefully before using the device. The warranty is only valid if the device is used according to the User’s Manual. Disassembling the Tobii I-Series device will void the warranty.

Keep the original packaging materials for the Tobii I-Series.

In case the device needs to be returned to Tobii for Warranty related issues or repair, it is required that the original packaging (or equal equivalent) is used for shipping.

A3  Training Resources

Tobii offers a range of training resources for the Tobii I-Series products and related communication products. You can find them on the Tobii website, www.tobii.com, including Getting Started Guides, webinars and Quick guides. The Tobii I-Series Quick Start Manual is delivered with, and stored on, the Tobii I-Series device.
Appendix B  Compliance Information

B1  FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

⚠️ Modifications not expressly approved by Tobii Technology could void the user’s authority to operate the equipment under FCC rules.

B1.1  For P15B Equipment

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

B1.2  For Portable Devices

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device was tested for typical hand held operations with the device contacted directly to the human body to the sides of the device. To maintain compliance with FCC RF exposure compliance requirements, avoid direct contact to the transmitting antenna during transmitting.

B2  Radio Wave Exposure and Specific Absorption Rate (SAR) Information

The Tobii I-Series device has been tested as a Class 1 Medical Device. Medical electrical equipment such as this requires special caution regarding Electro-magnetic Compatibility (EMC) and thus needs to be installed and placed into service according to the information provided in this manual.

⚠️ Using other cables and accessories other than those provided or that are integrated in the device may affect EMC performance.

The SAR (Specific Absorption Rate) limit as dictated by the FCC (in the USA) is 1.6W/kg averaged over 1 gram of tissue. In Europe/EU (CE regulations) it is 2.0 W/kg averaged over 10 grams of tissue. The Devices, Tobii I–12 (FCC ID: W5MTOBIII12A) and Tobii I–15 (FCC ID: W5MTOBIII15A) have been tested against these SAR limits to maintain compliance with FCC/CE RF exposure requirements.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The highest SAR value for the I–12 device is 0.501 W/kg. The highest SAR value for the I–15 device is 0.017 W/kg.

</thead>
</table>

where "P" is the maximum output power rating of the transmitter in watts (W) according to the transmitter manufacturer and "d" is the recommended separation distance in meters (m).

Field strengths from fixed RF transmitters, as determined by an electromagnetic site survey, should be less than the compliance level in each frequency range.

Interference may occur in the vicinity of equipment marked with the following symbol.

### NOTE 1
At 80 MHz and 800 MHz, the higher frequency range applies.

### NOTE 2
These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflected from structures, objects and people.

1. Field strengths from fixed transmitters, such as base stations for radio (cellular/cordless) telephones and land mobile radios, amateur radio, AM and FM radio broadcast and TV broadcast cannot be predicted theoretically with accuracy. To assess the electromagnetic environment due to fixed RF transmitters, an electromagnetic site survey should be considered. If the measured field strength in the location in which the Tobii I-Series device is used exceeds the applicable RF compliance level above, the Tobii I-Series device should be observed to verify normal operation. If abnormal performance is observed, additional measures may be necessary, such as reorienting or relocating the Tobii I-Series device.

2. Over the frequency range 150 kHz to 80 MHz, field strengths should be less than 3 V/m.

### Recommended separation distances between portable and mobile RF (Radio Frequency) communications equipment and the Tobii I-Series device.

The Tobii I-Series device is intended for use in the electromagnetic environment in which radiated RF disturbances are controlled. The customer or the user of the Tobii I-Series device can help prevent electromagnetic interference by maintaining a minimum distance between portable and mobile RF communication equipment (transmitters) and the Tobii I-Series device as recommended below, according to the maximum output power of the communications equipment.

<table>
<thead>
<tr>

Under test specifications specified in 6.2.1.10 EN 60 601-1-2 (2007) the Tobii I-Series device shall not:

- Exhibit component failure
- Exhibit changes in its programmable parameters
- Reset unintentionally to factory defaults
- Emit false alarms
- Initiate any unintended operation, even if accompanied by alarm
With regard to the test specifications specified in 6.2.1.10 EN 60601-1-2 (2007) the cessation or interruption of any intended operation, even if accompanied by an alarm, is allowed in the Tobii I-Series device due to it not performing any safety critical operations.

Also with regard to the test specifications specified in 6.2.1.10 EN 60601-1-2 (2007) errors of a displayed numerical value sufficiently large to affect diagnosis or treatment is not applicable for the Tobii I-Series device.

In order to maintain compliance as a Class 1 Medical device, the switches that are used in combination with the Tobii I-Series device must fulfill the isolation requirements of IEC/EN60601-1 based on 15 V DC. They must be electrically floating switches (switches that are not grounded).

**B3 Industry Canada Statement**

Low-power license-exempt radio communication devices (ICES-003)

De faible puissance exempts de licence des appareils de communication radio (CNR-210)

a. Common information
   Operation is subject to the following two conditions:
   1. This device may not cause interference, and
   2. This device must accept any interference, including interference that may cause undesired operation of the device.

b. Operation in 2.4 GHz band
   To prevent radio interference to the licensed service, this device is intended to be operated indoors and installation outdoors is subject to licensing.

   a. Informations communes
      Son fonctionnement est soumis aux deux conditions suivantes:
      1. Ce dispositif ne peut causer des interférences, et
      2. Ce dispositif doit accepter toute interférence, y compris les interférences qui peuvent causer un mauvais fonctionnement du dispositif.

   b. Le fonctionnement en bande de 2,4 GHz
      Pour prévenir les interférences radioélectriques aux services sous licence, cet appareil est destiné à être exploité à l'intérieur et à l'extérieur d'installation est soumise à licence.

This device has been tested to the safety requirements for exposure to radio waves (SAR) in RSS-102 to the General Public (Uncontrolled Environment) limits (1.6W/Kg). The highest SAR value for the I–12 device is 0.501 W/kg. The highest SAR value for the I–15 device is 0.017 W/kg. This device can be operated safely with a minimum distance 0 cm between the equipment and the user’s body.

Ce dispositif a été testé aux exigences de sécurité pour l’exposition aux ondes radio (SAR) dans le CNR-102 à le grand public (environnement non contrôlé) des limites (1.6W/Kg). La valeur maximale mesurée de SAR pour le I–12 dispositif est: 0,501 W/kg. La valeur maximale mesurée de SAR pour le I–15 dispositif est: 0,017 W/kg. Ce dispositif peut être exploité en toute sécurité avec un 0cm distance minimale entre le matériel et les corps de l’utilisateur.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme CNR-210 du Canada.

**B4 CE Statement**

This equipment complies with the requirements relating to electromagnetic compatibility, EN 300386 class B for ITE, the essential protection requirement of Council Directive 2004/108/EC on the approximation of the laws of the Member States relating to electromagnetic compatibility and R&TTE Directive 1999/5/EG to meet the regulation of the radio equipment and telecommunications terminal equipment.
B5 Standards

We, Tobii Technology AB, hereby declare that the Tobii I-Series products listed in this manual complies with the following directives:

- 93/42/EEC (MDD) - Medical Device Directive, as amended by 2007/47/EC
- 2011/65/EU (RoHS 2) - Restriction of Hazardous Substances Directive
- 2004/108/EC (EMC) - Electromagnetic Compatibility Directive
- 2006/95/EC (LVD) - Low Voltage Directive
- R&TTE 1999/5/EG (R&TTE) - European Radio equipment and Telecommunications Terminal Equipment Directive
- 2002/96/EC - WEEE Directive
- 2006/121/EC - Reach Directive

UL Demko (DK-33314-UL) Certified Conformity with IEC 60601-1 ed.3 and EN 60601-1:2006.

---

<sup>i</sup> Freedom of head movement describes the volume in front of the tracker in which the user must have at least one of the eyes. The numbers are specified parallel/orthogonal to screen surface, assuming eye tracker is at 20 degree angle to screen.
ii. Gaze accuracy describes the angular average distance from the actual gaze point to the one measured by the eye tracker. Accuracy under ideal conditions is measured with users placed in the center of the eye tracker track box with the head resting on a chin rest, and the room and screen illumination constant at 300 lux. Accuracy across head box is measured with users after calibration systematically positioned at varying positions ranging from center of the head box up to +/- 15 cm horizontal, +/- 10 cm vertical and +/- 10 cm distance. Accuracy across varying background illumination is measured with users’ head resting on a chin rest, and after calibration modifying background illumination from 1 to 1000 lux.

iii. Gaze Precision describes the point-to-point variation between individual gaze samples (here specified with binocular data, ie both eyes, and measured on artificial eyes). Gaze Precision with Stampe filter is with Stampe stage 2 noise-reduction algorithm applied to raw data (Stampe, Behavior Research Methods, Instruments & Computers 1993, 25 (2), 137-142). Precision without filter is based on raw data, without any de-noising filter applied, either inside or outside the eye tracker. Precision under ideal conditions is measured with users placed in the center of the eye tracker track box with the head resting on a chin rest, and the room and screen illumination constant at 300 lux. Precision across head box is measured with users after calibration systematically positioned at varying positions ranging from center of the head box up to +/- 15 cm horizontal, +/- 10 cm vertical and +/- 10 cm distance.

Support for Your Tobii Device

Get Help Online
Before contacting us, see the product-specific Support page for your Tobii device. It contains up-to-date information about issues and tips & tricks related to the product. Find our Support page online at: http://www.tobii.com/assistivesupport.

Contact Your Reseller
For questions or problems with your product, contact Customer Support at your Tobii Reseller for assistance. They are most familiar with your personal setup and can best help you with tips and product training. For our Resellers contact details, see http://www.tobii.com/en/assistive-technology/global/Contact/
