Printing in Snap Core First: Quick Guide

Printing pages from Snap Core First allows you to create low-tech versions of pages in the software. To print, you must be running version 1.11 or later.

1. Open **edit** mode.

2. Select the **'Page'** tab.

3. Select the **print icon** from the edit menu.

**OR**

Select **'Print Pages'** from the menu on the left and select 'Print.'

4. On the 'Select Pages to Print' window, the page that was being used within the software is already selected.

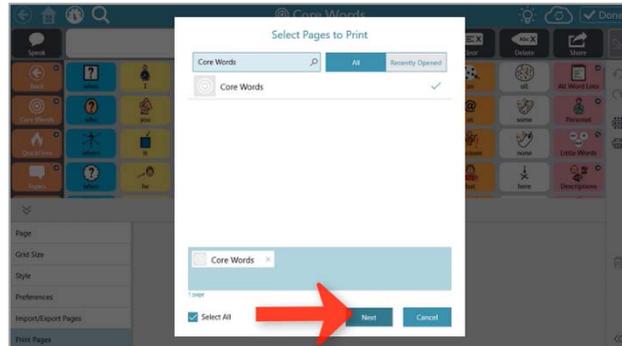

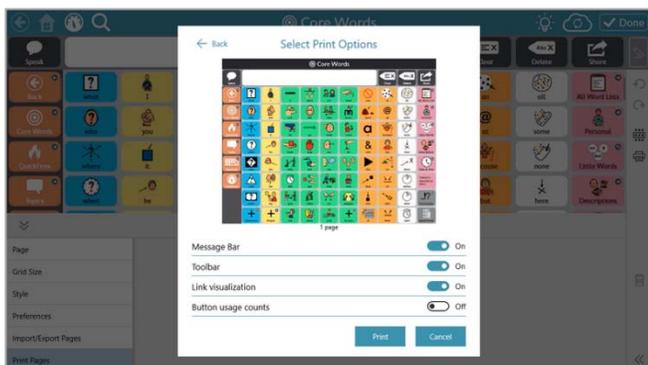

Search to add more pages to print.

5. Use the **'Select All'** toggle to select all the pages in your search. Use caution when using this feature – checking the box will replace pages that were already selected.

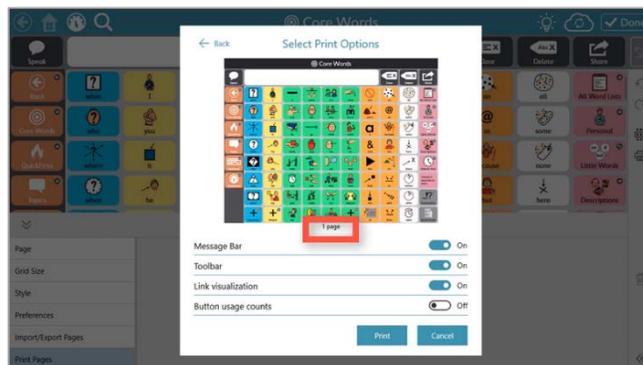

**6.** Select **'Next'** after all desired pages are selected.

7. On the 'Select Print Options' window **customize** how the printed page looks by toggling on or off the available options.

8. This preview **shows how many pages will print**. If pages required scrolling in the software, the preview will show more pages than initially selected.

9. Select **'Print'** once desired print options are set.

10. The print preview you see next is based on your operating system. Select **'Print'** again and you have a low-tech communication board at your fingertips!
