

Release Notes **Tobii Dynavox Virtual Remote**

Introduction

Virtual Remote lets you create gaze accessible remote controls for all devices that can be controlled with Infrared signals.

Virtual Remote requires a compatible hardware such as Tobii Dynavox EyeR, Indi or I-110 to operate.

System Requirements

- Windows 7, 8.1 or 10
- CPU 2.9 GHz or faster, Dual-Core
- RAM 4GB
- HD min 450 MB
- .NET 4.5
- USB 2.0

Release Version 1.0.1

Release date: 2017-07-10

Improvements

- Virtual Remote sometimes shown on two screens when launched from Windows Control Shortcuts. (ETECA-504)
- Virtual Remote re-launches Windows Control when exiting, even though Windows control is shut down. (ETECA-509)
- Warning messages are always shown on primary screen, even if that screen is not the eye trackable screen. (ETECA-511)
- Lingering Eye Trackable regions in the tutorial Pages. (ETECA-512)
- Application hangs when trying to connect to wrong COM port. (ETECA-523)
- Some terminology improvements in the UI.
- Increased the delay from when the Eye Tracker is turned off, to when signals can be recorded to ensure that no IR noise from the eye tracker is recorded. Added an animation during the delay.
- Added registry information for Tobii Communicator so that Communicator 5.4 can promote Virtual Remote as a Tobii Dynavox software that can be added on the Communicator Home Page.
