

Snap Scene®

An instant scene-based communication and language learning app for your child.

Catch the ball!

Communication in a Snap!

“Just In Time” programming makes Snap Scene the fastest and most effective tool for communication on the fly! Take a photo, tag it with a hotspot and recordings, then press play. Snap Scene easily and quickly turns everyday moments into chances to learn to communicate naturally.

Designed for young children (as early as infancy) at the beginning stages of learning communication who:

- do not speak
- may be slower in learning to talk
- may speak but are difficult to understand
- at risk for communication challenges

“Snap Scene is a perfect app for in the moment learning opportunities. Snap a picture, use your finger to draw hotspots on the image, record sound, add labels and Play. It’s that simple! I give it a thumbs up.”

- Dan Herlihy, AT Consultant

It's Never Too Early!

Snap Scene will set your child on the right path to communication. By starting early you can jump start your child’s language development. It can make the difference between language learning success and lifelong language difficulties.

In-the-Moment Learning!

Focus on the topics and content that interest your child no matter where you are or what you’re doing. By using Snap Scene, your child is an active part of the conversation and more motivated to communicate.

Provide Quick and Easy Language Growth

Using Snap Scene puts your child's language and literacy growth on the right path! Here are just a few of the benefits you can expect to find:

- A simple design – spend more time communicating rather than time flipping through a manual on how to set up a scene
- Natural and intuitive navigation between scenes - no training is required to use the program
- Tap on a hotspot and the word appears on the screen when spoken – this reinforces word meaning and literacy
- Recordings are in a familiar voice that's recognizable to your child.

Pathways for Snap Scene

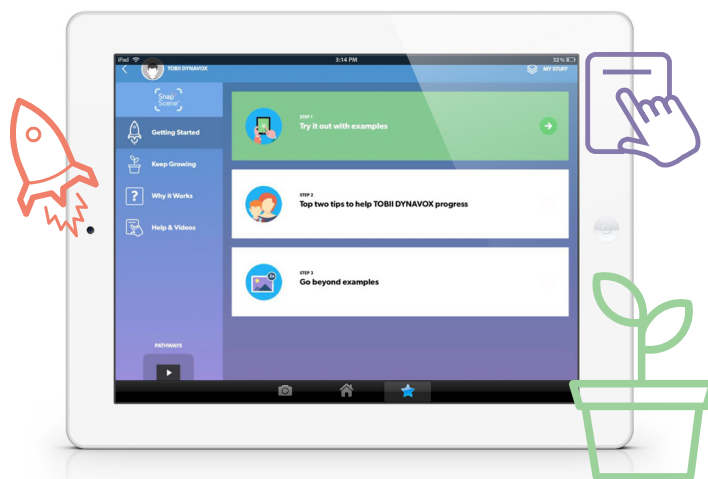

Tobii Dynavox Pathways™ is a FREE, one-of-a-kind companion app for Snap Scene. Based on best practices from experts in the field, Pathways provides tips, suggestions, and real-world videos to show parents, teachers, and even therapists how to get the most out of Snap Scene. Updated features now available.

Research-Based and Tested

Snap Scene is based on Easy VSD, which was shown in research by Dr. Janice Light to increase:

- initiating and maintaining social interactions
- sharing information and expressing needs and wants
- using new words and concepts including colors, numbers, and letter sounds
- combining words and concepts to express more complex ideas
