

SC Tablet

Communicate on the go with an iPad-based AAC device

SC Tablet is a durable iPad-based speech generating device made for people with communication impairments. Easy to carry with a built-in handle and stand, this durable device has a fitted case to withstand drops, complete with reinforced corners and a screen-protecting frame.

iPad solution

Communicate with a device that includes a 10.2" iPad.

Durable

Protect against drops thanks to crash corners and a snap-on faceplate.

Communication & durability

Powerful speakers

Make your voice heard loud and clear with integrated speakers.

Portable

Take the device anywhere with a sturdy built-in handle and kickstand.

Made for augmentative and alternative communication

SC Tablet includes Snap Core First pre-loaded to the iPad, offering a powerful AAC solution for people with communication impairments.

Snap Core First

This symbol-based app enables a path to communication and literacy at any stage of development. SC Tablet is also pre-installed with Snap Scene and Pathways among other select software, making it a complete AAC solution.

Pathways for Snap Core First

A free companion app for Snap Core First, packed with advice to help you succeed with AAC.

Snap Scene

An instant scene-based language learning app that turns everyday moments into learning opportunities.

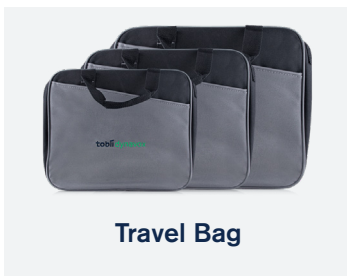

Pathways for Snap Scene

A free companion app for Snap Scene, packed with advice to jumpstart the learning process.

Accessories

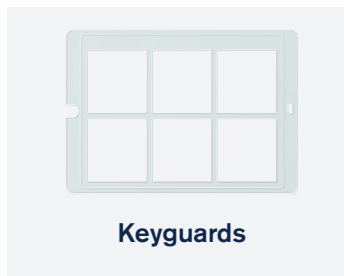

Make the most of your SC Tablet with these accessories, available separately.

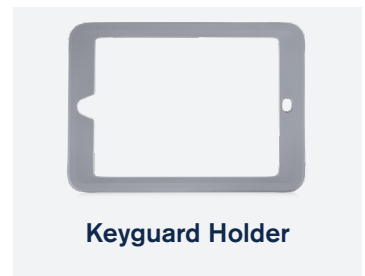

Travel Bag

Mount Plate

Keyguards

Keyguard Holder
